for use on Bedford street by the
superintendent of streets to the
amount of \$80 80

Electric Light Agreement

This agreement made and entered into this 1st day of January, A.D. 1910, by and between the Town of East Bridgewater, hereinafter known as the Town a municipal corporation in the Commonwealth of Massachusetts, and the Edison Electric Illuminating Company, of Brockton, hereinafter called the Edison Company, a corporation duly established and located at said Brockton in the Commonwealth of Massachusetts.

Witnesseth: That the Edison Company under the terms and conditions of this agreement agrees for the term of three years from January 1, 1910, to furnish to the Town of East Bridgewater incandescent street lighting, and the Town of East Bridgewater under the terms and conditions of this agreement agrees to pay to the Edison Company for said services as hereinafter specified.

The Edison Company agrees to furnish not less than one hundred (100) incandescent electric lamps now located and ordered by the authorized agents of the Town, and additional incandescent lamps as the Town may require; the additional lamps shall be located as directed by the Town by its authorized representatives or agents, said lamps to be located not more than four hundred feet from existing lines when additional poles are required, and not more than five hundred feet from existing lines if no additional poles are required.

POLES, FIXTURES, ETC.

The Edison Company shall provide, erect and maintain all necessary poles, wires, apparatus and fixtures needful to

maintain the lighting service in an efficient manner, and shall operate and care for all lamps in such a way as to afford first class service.

LAMPS

The incandescent electric lamps shall be what is known as the twenty-five (25) candle power and thirty (30) candle power, series Tungsten lamps, or a lamp of greater efficiency.

Each and every incandescent lamp shall be replaced by new lamps as often as is necessary to insure good service.

All incandescent lamps shall be placed on an iron arm suspended from a pole, unless at prominent places it is found necessary to suspend the lamp over the street to insure proper illumination.

HOURS OF LIGHTING

The lamps shall be kept lighted at least twenty (20) nights in each month; to wit, nights when there is no moon, from thirty (30) minutes after sunset to one o'clock A. M., and on the remaining nights of the month, from thirty (30) minutes after sunset until one hour after the actual rising of the moon, except nights when the moon is risen before the hour of sunset, in which event said lights shall be lighted at the setting of the moon, if before one o'clock A. M., and kept lighted until one o'clock A. M.; and in case of unusual darkness, caused by storm or otherwise, said incandescent lamps shall be put in operation and lighted at sunset.

MAINTENANCE OF LINES AND FIXTURES

In case any authorized agent of the Town shall deem any lamp posts, supporting posts or apparatus connected with the lamps or lines to be in a dangerous condition, he shall serve written notice on the Edison Company, stating the defects and requirements. If, within a reasonable time of receipt of such written notice, the Edison Company fails to

remedy these defects in a safe and proper manner, then the Town by its authorized agents may make the necessary repairs, alterations and changes, and recover from or deduct necessary expense thereof from any sums thereafter coming due said Company from said Town.

PATROL

The Edison Company shall maintain a weekly patrol of all the lamps installed under the terms and conditions of this agreement.

CLAIMS AND DAMAGES

The Edison Company hereby covenants for itself, its successors and assigns to indemnify and save said Town harmless from any and all claims or damages on account of injury to persons or property arising from imperfect or improper insulation of its wires or construction or maintenance of its wires, and from any and all claims or damages by reason of the infringement of any patent right in the use of the Company's lamps, machinery, or apparatus by said Town or by said Company on its lighting service.

MAP OF LOCATION

The Edison Company shall, when requested by an authorized agent of the Town, provide said Town with one map of the Town of East Bridgewater whereon the position of each and every light in the service of the lighting of the said Town by said Company shall be plainly shown; also a typewritten list wherein numbers and locations of each light shall be correctly enumerated, the said list to be corrected as often as any change takes place in the number and location of lamps, if so requested by the authorized agent of the Town.

LOCATIONS

The Town of East Bridgewater covenants and agrees to locate and authorize said Company to maintain at least one hundred (100) incandescent electric lamps.

PRICE

The Edison Company shall furnish and the said Town of East Bridgewater shall pay for said lamps at the following prices, and agreeable to the terms hereinafter stated:

For not less than eighty-five incandescent lamps of twenty-five (25) candle power, and such additional lamps of twenty-five (25) candle power as may be furnished under the terms of this agreement, the Town of East Bridgewater agrees to pay at the rate of sixteen dollars, (\$16.00) for each lamp per annum, and for not less than fifteen incandescent lamps of thirty (30) candle power and such additional lamps of thirty (30) candle power as may be furnished under the terms of this agreement, the Town of East Bridgewater agrees to pay at the rate of seventeen dollars (\$17.00) for each lamp per annum, subject only to deductions for outages as hereinafter stated.

PAYMENTS

The Town agrees to pay the amounts due for lights maintained and furnished according to the terms of this agreement during the calendar month next preceding on the tenth day of each month.

DEDUCTIONS

If any lamp or lamps to be furnished and maintained under this contract and in accordance with the conditions hereof shall fail to burn during any portion of the stipulated times of burning, one cent (\$.01) per hour for each incandes-

cent lamp thus failing, shall be deducted from the sum due the Edison Company, except when lights have been ordered out, or authorization has been given by duly constituted authority of the Town of East Bridgewater to said Company to turn off the current for a short period of time; also excepting the shutting off of the lights due to dangerous storms, in which event the deductions for lights out shall not apply.

Unless any lamp shall continually fail to be lighted for a length of time exceeding one hour no allowance shall be made for any outage, and it is further understood and agreed that no deduction shall be made on the failure to burn of lamps which have been broken for a period of twenty-four hours after such time as said broken lamps have been reported to said Edison Company.

No allowance shall be made for outage except on a true written report to said town made by its police or any person whose business it is or who may be authorized by said Town to overlook and report upon the condition of said lamps, and on condition that a duplicate of this report be mailed to the Edison Company at its office in Brockton on the date that said report was made to the Town.

TESTS

The Town may cause to be made by a qualified electrical engineer, at any time such tests to determine the candle power of the incandescent lights furnished under this agreement as said Town or agent may deem advisable; and if in any one month any lamp or lamps in the service of said Town shall at two consecutive tests so made show a less number of candle power than is herein stipulated and agreed the said Town may deduct such sum from any amount due from said Town to said Company, as may be proportionate to the shortage thus found in the candle power herein stipulated and provided for.

. CHANGES IN LOCATIONS

It is mutually agreed that if the Town shall by its authorized agent direct that for reasonable cause existing lamps be changed, renewed or relocated, such changes shall be made by the Edison Company at its own expense.

It is further agreed that upon violation or non-performance by the Company of any agreements, stipulations or conditions herein made, stipulated or agreed to by the Edison Company, the Town may forthwith cancel this agreement and bring action upon such Company for breach of any condition thereof, or may at its election bring successive actions upon said Company for breach of any condition thereof without cancelling this agreement, or may obtain satisfaction for violations or breaches according to provisions expressed in this agreement.

In witness whereof the said parties have caused their corporate seals to be hereto affixed and these presents to be executed, signed and delivered in their corporate names and behalfs by agents thereto duly empowered and authorized the day and year first above written.

All of which is respectfully submitted,

EZRA S. WHITMARSH,
 NEWTON CHURCHILL,
 FRED P. WHITMARSH,

Selectmen and Overseers of Poor.

Report of Inspector of Cattle.

To the Selectmen of East Bridgewater:

I hereby make the following annual report: I have carefully inspected 196 stables, 627 cows, 15 bulls, 403 swine, 4 goats, 4 oxen, 127 youngstock. Three cows were quarantined, two were killed and buried, one was released by the Cattle Bureau as not having any contagious disease.

Many stables have been changed and altered for the comfort and health of cattle and attendants.

Quite a number still remain unclean etc. as in past years, with no effort to better them.

Respectfully,

FREEMAN R. HATCH,

Inspector of Cattle.

Jan. 1, 1910.

Report of the Trustees of the Public Library.

TRUSTEES.

ORGANIZATION.

Chairman,	William H. Taylor
Secretary,	John E. O'Brien
Treasurer,	Isaac N. Nutter

The year of 1909 has been a busy one in the work of the library, and one of unprecedented prosperity. The report of the librarian, Miss Lucy L. Siddall, submitted with this is most gratifying to the Trustees, and we are sure it will be of interest to all friends and patrons of the library.

Her detailed account of the work during the year shows how extensively the library has been used by the public. The general circulation of books has been the largest of any year in its history and it is a source of pleasure to learn that the percentage of fiction is somewhat smaller than in previous years.

It is hoped that the pleasure and profit derived from the use of the library may be extended until all the citizens of the town have availed themselves of its advantages.

On June 25 the library completed twenty-five years of its existence, having grown from a nucleus of 468 books to 5,965 volumes, and we believe that now we have a library which is a credit to any town the size of ours.

Of course could there be larger appropriations, the facilities for broader work, and consequently greater usefulness to the patrons would be assured.

We feel that reference work should increase along with the circulation. An urgent need in the near future will be the purchase of more book-cases, our shelving capacity being already exhausted.

The trustees have purchased, as an experiment, a stereoscope and forty-two very fine views of the City of Washington, D. C. These we hope will prove both a source of much pleasure and of educational value to all who examine them. They may be seen by any one upon application at the desk. Should this branch of the work become popular it is hoped to add views of other places from time to time.

It is with sorrow that the trustees report the death of one member of the Board, Miss Mary H. Rust, who for a long series of years had shown her love for the library and her devotion to its interests by her faithful work and untiring zeal in its behalf.

At a regular meeting of the Board, the following resolutions, prepared and presented by a committee chosen for that purpose, were unanimously adopted:

Whereas, Our former associate on the board of trustees, Miss Mary H. Rust, passed away June 16, 1909, after a useful life of more than four score years, spent mainly, in this, her native town, it is

Resolved, That, in the death of Miss Rust the town loses a trustee of the public library who has been a faithful and

efficient member of the board for many years, giving willingly of her time and experience for the upbuilding of the library, and showing in many ways her love for, and devotion to its interests.

Resolved, That Miss Rust, as teacher in both public and private schools, has by her successful work accomplished much in the education of boys and girls who came under her influence, many of whom have filled places of trust and honor in our community and vicinity, thus winning a deserved reputation as a faithful and competent instructor. It was voted that these resolutions be spread upon the records of the Trustees and a copy be sent Mr. William A. Rust, brother of the deceased.

By the request of Miss Rust the library has received from her estate a number of valuable articles which are enumerated among the gifts in the Librarian's report.

We have also received a legacy of \$500 from the estate of Mrs. Lucy A. Griffin, the income to be used for the general interests of the library.

The library is open for the distribution of books from 3 to 8 p. m., Monday, Wednesday, Friday and Saturday of each week.

Any resident of the town of East Bridgewater who can furnish satisfactory reference, is entitled to draw books from the library.

Temporary residents may borrow books on making a deposit of \$1, this sum to be returned to the depositor upon surrender of his privilege.

Change of residence must be reported at once.

Two books may be drawn at one time provided only one is fiction.

Special arrangements may be made by teachers requiring a greater number of books, and a longer time to use them for school work.

At the end of the current month all periodicals may be taken out, and may be kept seven days.

Bound volumes of periodicals circulate under the same rules as books.

All books except periodical one month old and "seven day" books may be kept two weeks and may be renewed for one week.

Requests for renewals may be made in person or by mail. In each case the call number of the book and the date on which the book is due must be given.

A fine of two cents a day (including Sundays and holidays) must be paid on each work kept over time.

A borrower must pay for books lost or damaged while charged on his card. No books may be borrowed until fines and claims for damages have been paid.

Borrowers are expected to note the expiration of the time limit. No claim to exemption from fine can be established because of the failure of any notice to or from the library.

By a system of inter-library loan this library is often able to borrow from other libraries, books needed for special study.

JOHN E. O'BRIEN,
JOSEPHINE D. HARRIS,

Librarian's Report.

To the President and Board of Trustees of the East Bridgewater Public Library:

I herewith submit the annual report of the East Bridgewater Public Library for the year ending December 31, 1909.

In accordance with recent custom, the details of the libraries activities for the year are arranged alphabetically by subject.

ACCESSIONS.

During the year, 268 volumes have been added to the library; 222 by purchase, 33 by gift, 13 by binding periodicals.

BINDING.

Number of books rebound,	63
Number of periodicals,	13

BOOKS LENT.

The library was open for circulation 186 days in 1909. The number of volumes lent for home and school use during the year was 14,218.

Divided according to classes the circulation was as follows :

Philosophy and Religion,	75	.05
Fine Arts,	117	.08
History,	119	.08
Useful Arts,	165	1.16

Sociology,	204	1.43
Biography,	239	1.68
Natural Science,	251	1.76
Travel and desc.	268	1.88
Literature,	502	3.53
Magazines,	850	5.97
Juvenile fiction,	4,662	32.36
Fiction,	6,766	47.58
Total,	14,218	100.00

The largest number of books issued on one day was 123 on February 24. The smallest number issued was 37, on June 25. The largest month's circulation, 1,566, was March. This year the library has had the largest month and the largest year of circulation in its history.

Comparative circulation by years for the last ten years is as follows:

Year Ending December 31, 1899	13410
“ “ “ 31, 1900	11747
“ “ “ 31, 1901	10487
“ “ “ 31, 1902	11789
“ “ “ 31, 1903	10371
“ “ “ 31, 1904	10844
“ “ “ 31, 1905	9551

CATALOGUE.

Author, title and subject cards have been written for the 268 volumes added, thus keeping the catalogue up-to-date. A list of the books added during the year follows this report.

GIFTS.

A legacy of five hundred dollars from the estate of Mrs. Lucy A. Griffin.

From the Commonwealth the usual Public Documents.

The Appreciation of Pictures, R. Sturgis.

The Appreciation of Sculpture, R. Sturgis.

The Fortnightly Club of 1908-1909.

The Colonel of the Red Hussars. Miss Grace H. Harris.

Life of Cyrus H. McCormick, the Publishers.

Life of Mary Baker Eddy, Anno.

A brass andiron set, for the Trustees' room.

Three etchings of English Cathedrals.

A copy of the Sistine Madonna.

A water-color painting of the "Old Forge," [an old land-mark of East Bridgewater.]

A French Dictionary in 2 vols.; the estate of Miss Rust.

Eighty-six post-cards, collected by Chief Boatswain Henry Hudson, in his cruise around the world.

These were exhibited on the bulletin board, in order of ports visited and proved instructive and interesting.

They may now be found in the Reading Room.

PERIODICALS.

The library subscribes for the following magazines.

American Boy,

Atlantic,

Century,

* Christian Register,

* Commoner,

* Farm Journal,

Good Housekeeping,

Harper's Monthly,

* Donated

- Harper's Weekly,
 Journal of American History,
 * Life,
 Modern Priscilla,
 * New England Homestead,
 New England Magazine,
 * Our Dumb Animals,
 Our Fourfooted Friends,
 Outlook,
 Popular Electricity,
 Popular Mechanics,
 * Patent Office Gazette,
 St. Nicholas,
 * Saturday Evening Post,
 Scribner's,
 Society of Mayflower Descendants,
 World's Work,
 Youth's Companion,

READING ROOM AND REFERENCE WORK

The reading room has been well patronized through the year, many evenings in winter every chair being occupied.

More use has been made of the library, along the line of research, than ever before. The librarian will be at liberty to assist in the use of reference books from 4 to 5.

REGISTRATION

The total number of borrowers registered since the opening of the library June 25, 1884 to Jan. 1, 1910, was 3,107. One hundred and thirty-nine have registered in 1909.

* Donated.

STEREOSCOPIC VIEWS

The library has purchased a stereoscope and 42 views of the city of Washington. *Y. M. C. A. building*

These views may be seen at the library. It is hoped to add views from time to time and eventually to circulate.

CONCLUSION

As was said last time we said again
 "The year has been the busiest in the history of the library ; in the number of books circulated, in the number of new books cataloged ; in the number of visitors to the reading room and in the amount of school and reference work done."

The statistics show admirable results, but the work that is not recorded, the work in reference and reading room, counts almost as much in the real service rendered by the library to the public.

As we acquire a greater number of technical magazines and reference books of value, we hope to see this work and the circulation increase side by side.

Let there be
the bookroom staff
in 1911 -
 Respectfully submitted,

LUCY L. SIDDALL,

Librarian

Report of the Board of Health For 1909.

MEMBERS.

Cleaveland A. Chandler,	Term expires 1912.
Percival M. Churchill,	Term expires 1912.
James Brandley,	Term expires 1910.

The Board organized at its meeting March 8 by choosing Mr. Chandler as chairman and Mr. Brandley as secretary.

Percival M. Churchill resigned his membership on Board June 21.

Mr. S. W. Ward re-appointed inspector of slaughter houses. He reports that he has inspected 259 calves, 2 cows, 126 pigs, all of which he found in a healthy condition.

The following diseases were reported and notice sent to the State Board of Health :

Measles 143 ; scarlet fever 4 ; varicella 7 ; tuberculosis 78.

Sixty-one burial permits were issued during the year. Of this number fourteen were issued for the Millet Sanitarium.

CLEVELAND A. CHANDLER,
JAMES BRANDLEY.

Report of the Local Superintendent for Suppressing the Gypsy and Brown Tail Moths.

During the winter of 1906-7 the town was scouted for Brown Tail webs, at which time some over 1000 webs were removed. The following winter 1907-8, the conditions were so favorable that it was not considered necessary to go over the town, but to let the work go over to the following winter, 1908-9. At this time a thorough scout of the town was again made and 938 webs removed. It will be seen that this is a very small number, when we consider the increase in some of the surrounding towns and the fact that this town had not been looked over for two years.

In regard to the Gypsy Moths the situation is different. With this pest, a close watch must be kept each year if we wish to keep it under control. The following gives a general idea of the findings along this line for the past few years. During the winter of 1907-8, a very thorough scout of the town was made and 2540 egg clusters found and destroyed. The following summer, 41,844 burlaps were applied, from which 19,534 larvae, (caterpillars) were taken.

The next winter, 1908-9 the town was scouted as before, with some additional woodland, but only about 1200 egg clusters were found. The next summer, owing to a much smaller amount of money being available from the state, a smaller section was burlaped. This included all the residential and street colonies, together with a part of the woodland colonies.

In these different sections, 9,880 burlaps were applied, and 2,696 larvae taken. It is of interest to know that over this same territory the previous summer, 12,909 larvae were taken, nearly five times as many.

This passed fall, of 1909, everything outside of the woodland has been scouted and also quite a percentage of the wooded sections. Up to January 1, 1910, there has been found and destroyed, 728 egg clusters.

The following is a statement of the receipts and expenditures for the year:

Expenditures	\$1,715 81
Receipts	
From the State	\$809 11
From the Town	786 16
From Property Owners	120 54
	<hr/>
	\$1,739 18

WILLIAM T. GREENE,
Local Superintendent.

INVENTORY OF TOOLS

7 axes	2 hand saws
4 small axes	3 Drew scrapers
1 heavy scraper	4 apple tree scrapers
1 bush hook	2 axe handles
4 bush scythes	1 weed scythe
1 lawn rake	1 bush sneath
15-ft. 1-2 in. hose	6 pr. tree spurs
2 whet stones	2 twin brush cans
4 pails	1 trowel
1 24-ft. slip ladder	2 long handled pruners
1-2 bbl. oil	1 grind stone

Report of Fire Warden.

On account of the great number of elm leaf beetles, 1309 elm trees were sprayed. The expense for this work was so great that we were unable to set out any trees and to do but little pruning.

AMOUNT AVAILABLE.

Appropriated	\$200 00

REPORT
OF THE
SCHOOL COMMITTEE
AND
Superintendent of Schools
OF THE TOWN OF
EAST BRIDGEWATER
FOR THE YEAR 1909

ROCKLAND:
THE ROCKLAND STANDARD PUB. CO. PRINT
1910

School Committee's Report.

SCHOOL CALENDAR, 1910

GRADE SCHOOLS

Spring term begins April 4, closes June 10: 10 weeks.

Fall term begins September 6, closes December 16: 15 weeks.

Vacation, Thanksgiving day and day following.

Winter term begins January 2, 1911, closes March 17: 11 weeks.

HIGH SCHOOL

Spring term begins March 28, closes June 24: 13 weeks.

Fall term begins September 6, closes December 23: 16 weeks.

Vacation, Thanksgiving day and day following.

Winter term begins January 2, 1911, closes March 24: 12 weeks.

NO-SCHOOL SIGNALS

Five blasts of the Carver Cotton Gin Co.'s whistle, blown at 7.30, give notice that none of the schools will be in session for the forenoon.

Four blasts blown at 7.45, no school in the forenoon in all schools except the High.

Four blasts blown at 12.45, no school in the afternoon.

Signals—Eight seconds with intervals of 15 seconds.

Regular meeting of the Committee, second Monday evening of each month, at 8 o'clock at the Committee's office in the Bank building.

Superintendent's office hours—Mondays and Thursdays, from 3.30 to 5.00 p. m., when schools are in session. Office in Allen building.

To the Citizens of the Town:

The School Committee herewith presents its annual report for the year ending Dec. 31, 1909.

COMMITTEE

Edward T. Morse	Term expires 1910
Samuel K. Nutter	Term expires 1910
Herbert C. Thorndike	Term expires 1911
Charles L. Nutter	Term expires 1911
John E. O'Brien	Term expires 1912
William H. Taylor	Term expires 1912

ORGANIZATION

Chairman	William H. Taylor
Secretary	Samuel K. Nutter
Treasurer	Edward T. Morse
Prudential Committee	William H. Taylor
Supply Committee	Edward T. Morse

At the March meeting of the Committee the following truant officers were elected ; W. T. Greene, George Hudson, Edgar H. Grout and T. S. H. Rounsville.

By the unanimous vote of the Committee of the three towns comprising our school district, Edgar H. Grout was

again re-elected Superintendent. His long connection with our schools and consequent knowledge of their needs, enables him to speak with assurance, making his report to the Committee of great value to all who are interested in the welfare of our public school system.

We have been careful to attend to all necessary minor repairs on the school buildings, thus endeavoring to keep all school property in as good condition as possible. Some of these buildings are quite old, hence it is more difficult to keep them in good repair.

The out houses at Northville, which were found to be in a bad condition, have been raised and repaired, and the entire set of buildings painted two coats. There is great need of considerable grading between this school house and the out buildings. In a wet time water and mud stand there to some depth.

The buildings at Eastville have also been painted. A second coat should be added very soon.

We also recommend that the High school buildings be painted this year.

We have placed slate black-boards in the primary room at the West building, thus making Satucket the only school room now in use in the town not supplied with these boards.

The room formerly occupied by the High school is now used as a laboratory, new tables and other fixtures having been installed this year. This certainly is a great improvement upon former conditions.

It will be noticed from the treasurer's report that we have exceeded the appropriation for incidentals by \$110.50. In the appropriation for laboratory fixtures we found that no provision had been made for the installing of same. The expense incurred for this work, and the cost of four book-cases for the Allen school, which seemed to us necessary, more than covers this excess.

The medical inspector has been paid for more than a year ; that is, from September, 1908 to December 1909, which accounts for excess on that item.

Our fuel bill was more than \$250 in excess of the previous year.

We recommend the following appropriations for the coming year :

Support of schools	\$11,199 00
Books and supplies	750 00
Incidentals	350 00
Minor repairs	200 00
Transportation	650 00
Music	300 00
Black-boards	60 00
Superintendent of schools	350 00
Painting	100 00
Medical inspection	75 00

Respectfully submitted,

EDWARD T. MORSE,
SAMUEL K. NUTTER,
HERBERT C. THORNDIKE,
CHARLES L. NUTTER,
JOHN E. O'BRIEN,
WILLIAM H. TAYLOR.

REVIEW OF THE YEAR

The past year has been marked by an unusual number of changes in our teaching force. Of the nineteen regular teachers employed at the time of the last annual report only eight are with us today. Nine of our teachers resigned to accept positions in other schools at an increased salary, while two have left us to take up the duties of home life.

The problem of filling vacancies increases in difficulty from year to year, though the re-arrangement of grades at the Center has simplified it somewhat. Our schools need strong, well-trained, and experienced teachers who possess not only skill in teaching but tact in dealing with the many problems that confront teachers in communities more or less rural in character. To find such teachers means the expenditure of much time and thought, as well as money in investigating the records of candidates. Before engaging a new teacher the superintendent must be reasonably satisfied that the applicant possesses such qualifications as will in all probability make her a success. Even then he is sometimes disappointed, for personality, which counts for so much in a teacher's success, cannot always be correctly judged on short acquaintance.

The fact that one-half of our teachers have been taken from us the past year by the attraction of higher salaries calls for serious consideration on the part of voters and patrons of the schools. While we have been, on the whole, successful in filling vacancies, the fact remains that lack of permanency in the teaching force lessens the efficiency of the schools and makes extremely difficult the carrying out of definite administrative policies. I would therefore urge upon the committee an immediate consideration of teachers' salaries. At present the average monthly salary paid to our female teachers, including both grade teachers and high school assistants, is \$44.84, an

amount which is eight dollars less than the average for the county and nearly fifteen dollars less than the average for the state. These figures are significant and in a measure explain the difficulty we experience in retaining our teachers for any considerable length of time.

On the opening of schools in September it was found that the West building was overcrowded. Several pupils were accordingly transferred to the Allen school. The transfer was made with relatively little confusion or inconvenience, a fact due in a measure to the readiness of the parents to meet the new conditions unavoidably imposed upon them.

No one year shows any marked increase in school population, though we have made a gradual gain until our enrolment has passed the six hundred mark. In general our pupils are comfortably housed with but little overcrowding at present, except at the Northville school. Here in a room suitable for not more than thirty pupils we are obliged to care for thirty-five to forty pupils, some of whom are obliged to sit uncomfortably near the stove, while others are within three or four feet of the front of the room. There seems to be but little relief in sight unless we reduce the number of grades still farther, or ask for a new two-room building to be erected on the present lot and thus furnish instruction for our upper grade pupils in their home school. If we could be sure of a constant school population, this latter plan would seem the better of the two. Temporary relief, at least, could be afforded by the purchase of a portable house which could be placed on the same lot with the building now in use.

Parents in general recognize the fact that cordial relations must exist between the home and the school, if the best results are to be obtained. It is a pleasure to record that such relations have existed during the past year to a gratifying extent. Whatever lack of harmony there may have been is attributable largely to misunderstandings. Parents are urged, therefor, to confer frequently with the

teachers regarding the work and conduct of their children, especially if the monthly reports indicate that either work or conduct is unsatisfactory.

Friendly co-operation on the part of the home is a tower of strength to the teacher, while nothing is so subversive of school discipline as the knowledge on the part of pupils that unsatisfactory work and conduct will meet with no rebuke at home. As parents we are sometimes at a loss to know what is best to be done in dealing with one or two children. Surely then the teacher who has forty such problems, each one different from all the rest, has a right to ask of parents sympathy and co-operation in her work and patience for mistakes due to human limitations.

RECENT LEGISLATION

One of the important measures passed by the last legislature was an act entitled "An Act to Consolidate the Board of Education and the Commission on Industrial Education." Extracts from this law follow: Chapter 457, Section 1. The board of education shall consist of nine persons, three of whom shall annually in April be appointed by the governor, with the advice and consent of the council, for terms of three years, except as hereinafter provided. . . . Four of the present members of the board of education, and one of the members of the commission on industrial education shall be appointed members of the board of education provided for by this act.

Section 2. The board of education shall exercise all the powers and be subject to all the duties now conferred or imposed by law upon the present board of education except as may otherwise be provided herein.

Section 3. The board shall appoint a commissioner of education, whose term of office shall be five years. He

shall exercise all the powers and be subject to all the duties now conferred or imposed by law on the secretary of the board of education. He shall be the executive officer of the board, shall have supervision of all educational work supported in whole or in part by the commonwealth, and shall report thereon to the board. . . . The board shall also appoint two deputy commissioners, at equal salaries, one of whom shall be especially qualified to deal with industrial education.

MEDICAL INSPECTION

Sight and hearing tests have been made in all the schools with the following results : Number of pupils enrolled 589 ; number found defective in eyesight 49 ; number found defective in hearing 12 ; number of parents notified 39. From these figures it will be seen that, while practically all of our pupils have normal hearing, eight per cent. are found to be defective in vision. The total number with vision more or less impaired is probably somewhat larger than that given above, for from the nature of the sight test we have been unable to apply it to first grade pupils. Of the forty-nine pupils with defective vision, probably the larger part should be fitted with glasses now or in the near future. Experience has shown that in most of the cases of impaired vision corrected by properly fitting glasses there has been a corresponding improvement in school work.

The state board of health, through its representatives and official publications, is carrying on a campaign against the use of the common drinking cup in public places, including the schools of the state. It has been proved conclusively that most human diseases are preventable and that many of the early deaths are avoidable. "At least 700,000 of the million and a half deaths occurring annually

in the United States result from the minute parasitic plants and animals gaining access to the body. * * The chief avenue by which bacteria enter the body is the mouth. The air, food, water, and especially the drinking cup are the usual means by which the disease producing parasites are transferred from one person to another. * * It is an established fact that a considerable number of well persons harbor in their mouths the germs of grippe, pneumonia, diphtheria and tonsilitis. * * Considerable evidence is at hand showing that the germs of sore throat, pneumonia and bronchitis are present in many people who mingle with the well and drink from public cups."

The preceding extracts taken from a paper prepared by Professor Alvin Davison of Lafayette College point to the danger that lies in the use of the public drinking cup. The committee and superintendent have under consideration at present the question of safeguarding the health of the pupils in our schools by abolishing the common cup, and definite action in this direction will be taken soon. Some provision will be made whereby each building having running water will eventually be provided with some form of hygienic drinking fountain and other buildings provided with hygienic water tanks. In these latter buildings individual cups will be in use.

The state law in regard to vaccination has not been rigidly enforced in our schools during the past few years. An inquiry into the matter revealed the fact that a considerable number of unvaccinated pupils, or pupils who had been vaccinated, but unsuccessfully, were attending school. Inasmuch as the school committee are under oath to enforce the school laws of the state, there seemed but one course open to them. Accordingly the following circular letter was sent to the parents of children who did not show the scar of successful vaccination.

East Bridgewater, Mass.
December, 1909

Dear

Your attention is called to the following extract from the Revised Laws of Massachusetts Chapter 44, Section 6, (As amended by Chapter 371, Acts of 1906, and Chapter 215, Acts of 1907.) "A child who has not been vaccinated shall not be admitted to a public school except upon presentation of a certificate granted for cause stated therein, signed by a regular practicing physician, that he is not a fit subject for vaccination." Also to the following vote of the school committee of this town: Voted, that the committee expect that all school children not previously vaccinated shall be vaccinated, or present a certificate as required by law, before January 1, 1910.

Respectfully,

Edgar H. Grout
Supt. of Schools

It is a pleasure to report that already a large proportion of the parents to whom notices were sent have complied with the requirements of the law. Among these are not a few who are opposed to vaccination but who have co-operated with the school committee, putting aside their personal preferences for the best interests of the schools and community at large. It is hoped that the very few who have not as yet responded to the notices sent will give this matter their early consideration. There may be no immediate danger of an epidemic of smallpox in our midst, but the fact that the disease has been epidemic in several communities in the state is simply indicative of what may befall any town or city in which vaccination is neglected.

BOOKS AND SUPPLIES

Your attention is respectfully called to the table given in my last report in which was shown the amount of money available per pupil for books and supplies each year during a period of twelve years, as compared with the average amount available for the towns and cities of Plymouth County. In this table it was shown that not only did we fall far below the average for the county, but that the amount available per pupil is not so large as it was twelve or thirteen years ago. Every effort is made to avoid extravagance in the choice and purchase of books and supplies, as well as in their use, yet the work is seriously handicapped by the lack of maps, globes, reference books, and at times, by a short supply of text books. I therefore earnestly recommend that the appropriation for the coming year be not less than \$750 or \$800. An additional reason for this recommendation is the fact that several sets of books in the upper grades have been in use four or five years and must be replaced or renewed during the current year.

HIGH SCHOOL

During the past year the High school laboratory has been equipped with two tables each for the departments of physics and chemistry, and with a hood for carrying off the poisonous gases generated in the experiments. These additions to the equipment of the school are highly appreciated by pupils and teachers and make possible a higher grade of work.

We are very glad to report that our High school has been approved by the State Board of Education, and that we are now permitted to send pupils directly to the normal schools of the state on the certificate of the principal of the school. Care, however, must be exercised in granting

these certificates, otherwise this privilege will be withdrawn. Only those pupils who have done a high grade of work during their four years' course and who give promise of good work at normal school will be certificated by the principal.

We are making every effort to raise the standard of our school and to impress upon pupils the fact that the high school diploma can be won only by faithful, consistent effort. The introduction of the point system makes it possible for any pupil at any time to determine the progress he is making toward graduation. Each study successfully completed at the end of the year counts a definite number of points, sixty-six points being the present requirement for graduation. Additional points, or credits, are given for superior work in any study and also for diligence and business methods: e. g. A pupil receiving for the year a mark of 80-85 per cent. receives one-fourth point additional; a mark of 85-90 per cent. earns one-half point additional; a mark of 90-95 per cent. three-fourths point additional; and a mark of 95-100 per cent. one whole point additional. On the reverse side of each report card sent to the parent is given the number of credits earned to date.

Under ordinary conditions the pupil can earn his sixty-six credits in four years' time. With the point system it is possible for the pupil of superior ability to complete his high school course in three years, while on the other hand the pupil who finds it impossible to complete the work in four years is strongly urged and advised to return for a fifth year. To do so would reflect credit upon him for his determination to earn his high school diploma at whatever cost.

During the past year geometry has been made an elective study, and bookkeeping is now offered to second year pupils.

The class of 1893 has presented the school with a barometer for use in the laboratory, and Judge Robert O. Harris has given a model of a full rigged ship which has been placed in the assembly room. We are glad of this opportunity to acknowledge the receipt of these gifts to the school and to extend our thanks to the donors for them.

Attention is respectfully called to the following report of the principal and to his plea for an additional teacher in the school.

Report of High School Principal

E. H. Grout, Supt. of Schools
East Bridgewater, Mass.

Sir:—The growth of a school ought to be hardy and perennial. For your High School I hope for such a growth. So early in my administration it would be presumptuous for me to claim to have effected those favorable things which I have sometimes noticed. I choose to regard them as the fruition of the work of previous teachers. But surely I see favorable things. The membership does not fall off. The attendance rate to date is exceedingly high. Most of the students are doing a fair amount of profitable work. Those that are not doing so lack the personal help that we three teachers have not the time to give; and we give to the limit of our strength. I have said that the membership is not falling off. This is a condition which can hardly be assured unless somehow, from some quarter, this personal help is coming. We need another teacher. Grant us this boon and the number of students who would desert the ranks midway would from year to year be inconsiderable. The students are well, happy, well disposed. Help us to keep them so. -

In conclusion, I would make no promises whatever. All the world would not satisfy me. I am hoping for a good deal and expecting a little. Say to those who doubt whether any good thing can come out of our stewardship, that they shall see—they shall see.

GEORGE F. TURNER.

Report of the Music Supervisor

To the School Committee, Town of East Bridgewater :

The work in music this present school year has proved most satisfactory.

The interest which the children show in regard to the study of music seems to be increasing and as a result of this, more work can be done and greater progress made.

The course of study as planned for each grade is as follows :

GRADE I

The major scale taught as a rote song. Staff reading and memorizing of the first five tones of the scale. The first principle in time, represented by whole, half, dotted half, quarter notes. Rote songs, individual singing.

GRADE II

Staff reading and memorizing of remaining tones of scale. Second principle in time, represented by two eighth notes. Rote songs. Individual singing and written work.

GRADE III

Difficult melody. To find "Do" from any signature. The third principle in time, represented by dotted quarter and eighth notes. Rote songs. Individual singing and written work.

GRADE IV

Names of all the keys. Chromatic tones represented by a sharp, double sharp and cancel. In time, thorough review. Two part singing. Individual singing and written work.

GRADE V

Chromatic tones represented by flat, double flat or cancel. Theory of common time. Arithmetic applied to music. Individual singing and written work.

GRADE VI

Position of sharps and flats in the signature. Theory of the use of the five chromatic characters in writing. The fourth principle in time, represented by three-eighth notes (triplet). Also second form of triplet. Theory of compound time. Principle in time represented by four sixteenth notes, also the rhythm represented by dotted eighth and sixteenth notes. Song interpretation. Individual singing and written work.

GRADE VII

Thorough review. All common words and marks of expression should be understood. Three part singing. Individual and written work.

GRADE VIII

The bass clef. How to read the tenor part. In time, review. Sight reading with words. Three or four part singing. Possibly some history and biography. Individual singing and written work.

GRADE IX

Interpretation of songs. Four part singing. Sight reading with words. Elementary harmony, history and biography. Individual singing and written work.

ETHEL C. GRIMES,
Supervisor of Music.

Report of Medical Inspector

To the School Committee and Superintendent
of Schools:

I herewith submit to you my report as Medical Inspector;—

I can report considerable improvement in several respects in the general physical condition of our school children over that of last year.

A word to the public as to what medical inspection of our school children is. It is to determine, if possible, as to whether there is any diseased condition present or not.

To determine this, proper hygienic methods are followed, and nothing is done that any parent or child need have any fear of whatever. It is all for the good of the child. The Medical Inspector's duty ends with the examination. He reports to parent or guardian what he finds and the parent or guardian is then left to employ his own family physician as he likes.

Under the present system and with the facilities at hand, it is impossible to make as thorough an examination as one would wish. It is an advance in the right direction and much good can and is being accomplished. If we, in any way, can raise the general health of our school children, we in just this proportion, raise the educational standard of our schools, make more useful citizens, and thereby raise the standard of our town physically, intellectually, morally, financially.

The hygienic and sanitary conditions of our school buildings are, in most cases, very good. That in some of our outly-

ing districts might be improved on somewhat, especially ventilation. There should be means of ventilation so that the children are getting a constant supply of fresh air; opening the doors or windows occasionally is not enough. If there is not a constant supply of fresh air entering the room, the air very soon becomes foul and not fit to be breathed in.

I would like to see more attention paid to the care of the teeth. Too much cannot be said along these lines as our teeth are too valuable to be left to decay and on the other hand these cavities are pockets for decayed matter and breeding ground for all kinds of germs which are sure to enter the system.

I wish here to condemn the public drinking cup, as in use in our schools. There is no more potent means of communicating disease than to allow a whole school building full of children to drink out of the same cup. If any disease is present it is sure to be spread. No one thing in our power to eradicate disease would bring better results than to abolish this harmful practice. A dozen or more diseases could be transferred in this way, among the more common are diphtheria, scarlet fever, typhoid fever, tuberculosis, grippe, syphilis, smallpox, tonsilitis, itch and last, but not least, pin worms. The public drinking cup is bound to be abolished and the sooner the better.

Personally, I hope to see the time when everyone shall realize the value of vaccination. It has done more to save human lives than any other dozen treatments combined. Properly done with the present means at hand it is in reality practically a harmless procedure. The vaccine virus as prepared by the leading companies, is clean in every respect, and is not sent out for use until it has been most carefully tested. Most children are more or less indisposed for a day or two. This is nothing in comparison to having what vaccination will prevent and that is smallpox. Smallpox is not a far away danger. At the present time we have the disease in several

towns in our state and he who is not vaccinated is in constant danger of contracting the disease. If everyone were successfully vaccinated, we would have no smallpox, while on the other hand if no one were vaccinated in the next twenty years, we would be having as much smallpox as seventy five or a hundred years ago.

Following is a schedule of diseased conditions found, their number, and the number recommended for treatment.

DISEASES.

	Total No.	Advised treatment
--	--------------	----------------------

NOSE

Enlarged Tubinates	4	4
Adenoids alone	6	6

MOUTH AND THROAT

Adenoids with enlarged tonsils	10	10
Enlarged tonsils alone	70	43
Decayed teeth	41	41
Tongue tie	3	3
Elongated uvula	6	6
Alveolar, abscess	1	1

Eczema	6	6

HAIR AND SCALP

Pediculosis	22	22
Seborrhea Capitis, crusts on scalp	3	3

TUBERCULOSIS

Hunch back	1	
Scrofulosis	4	4

GENERAL DISEASES

Anaemia	8	8
Asthma	2	2
Heart disease	2	2
Incontinence urine	2	2
Shortened leg	1	
Flat foot	1	1
Deformed face	2	
Deformed wrists	1	
Stammering	2	

I wish to take this opportunity to thank all who have in any way aided me in this work.

Respectfully,

I. I. RICHMOND, M. D.,
Medical Inspector.

January 29, 1910.

Conclusion.

The principal topics considered in this report may be summarized briefly as follows :

1. Problem of filling vacancies.
2. Increased pay for teachers recommended.
3. Additional school accommodations needed at Northville.
4. Co-operation of home and school.
5. Recent legislation.
6. Use of common drinking cups in school to be discontinued.
7. Vaccination.
8. Increased appropriation for books and supplies recommended.
9. High school.
 - a. Laboratory equipment installed.
 - b. Pupils admitted to normal schools on certificate of principal.
 - c. Point system explained.
 - d. Gifts to the school.
10. Reports of High school principal, music supervisor and medical inspector.

In concluding this report I desire to record my appreciation of the continued support given me by the school board and of the co-operation of the teachers during the year.

Respectfully submitted,

EDGAR HOMER GROUT,
Superintendent of Schools.

East Bridgewater, Mass., January 31, 1910.

\$6,486 90

Cash paid treasurer for sale of pipe	\$1 00
Loan authorized	7,000 00

After receiving a number of bids for installing a system of water supply for Northville, we awarded the contracts to Geo. M. Webber and Michael F. Roach who were the lowest bidders.

On December 31st we had 30 takers, one commenced Jan. 1st., and six more are piped to take in the spring.

We have paid treasurer \$75 rental to December 31st, 1910. We have pipe and material on hand to the value of \$63.55.

Trust Funds

ALDEN FUND

Amount on deposit \$5,037 27

We have paid interest for fuel to the
amount of \$182 09

During the past winter a fire swept over the entire lot.
We have sold the pine, and are cutting the hard wood.
After removal of same, the lot will be worthless for many
years.

LATHAM FUND

Amount on deposit \$500 00

We have paid interest from this fund
for water and care of hedge to the
amount of \$20 20

WHITMAN AND CROSSMAN FUND

Amount on deposit \$2,000 00

We have paid interest from fund of \$40 40
and the same amount is due but not collected.

Report of Inspector of Cattle

To the officers and citizens of town :—

I hereby submit the following report for the year. I have thoroughly inspected 167 stables, 547 cows, 18 bulls, 165 young stock, 2 sheep, 5 goats, 4 oxen, 487 swine. Quarantined 3 cows which have been condemned, killed and buried, having tuberculosis.

I wish to say that in my past annual inspection I find less care taken with some of the cow stables than formerly. Some of those in foul condition formerly, are improved.

FREEMAN R. HATCH,
Inspector of Animals.

Report of the Trustees of the Public Library

TRUSTEES

Josephine D. Harris	Term expires 1911
William H. Osborne	Deceased
Isaac N. Nutter	Deceased
William H. Taylor	Term expires 1912
John E. O'Brien	Term expires 1913
Mabel L. Hobart	Term expires 1913

ORGANIZATION

Chairman	William H. Taylor
Secretary	John E. O'Brien
Treasurer	Isaac N. Nutter

During the year 1910 the library has continued its usual routine work with gratifying results. More citizens have availed themselves of its privileges than in any previous year of its history. The large circulation of books, reported last year, has been exceeded in 1910 by 311 volumes. Reference to the Librarian's report, submitted with this will show that much more has been done this year in circu-

lating books along the line of reference work. This is only a part of the library's real work, and should grow from year to year. The library and the school should work side by side.

In the sudden death of Judge Wm. H. Osborne last June the town lost a faithful and efficient member of the board of Trustees, and one who had by his interest in, and his efforts for the library, done much to increase its usefulness.

Just after we had entered upon the new year and before the report of 1910 was written, we were shocked by another sudden death, that of Hon. I. N. Nutter. Mr. Nutter had been a trustee of the library from its very beginning in 1884, and was the first and only treasurer of the Board. Much of the present prosperity of the library is due to his untiring interest and zeal. But Mr. Nutter's interest did not end in the routine work of the library. That we have a library building, a credit and an ornament to the town, is largely due to Mr. Nutter's efforts in interesting Mr. Washburn in our behalf, when he told him that he wanted to do something for this, his native town. Surely his memory in East Bridgewater will be perpetuated by the fruits of his labors for its public library.

A brass railing has been placed on the steps to the library building which is proving a help and satisfaction to many of the older patrons.

The Trustees bespeak the co-operation of all uses of the books, for the better care of the same; which we believe are often needlessly damaged. Rebinding is the most serious expenditure the library has to meet. Money spent and nothing new added to our resources. If this expense could be eliminated more books could be purchased.

Two new supplementary volumes of the Century Dictionary, first issued in 1889, have been purchased for the library, bringing the work up to date. Also Webster's New International dictionary. Placed on a standard near

the card catalogue, the latter is easily accessible to the public.

The Trustees were glad to receive from the estate of Miss Mary H. Rust a much needed book-case, which makes possible the placing of over 100 books, where the children can make their own selection. It is an advantage to the child to see the book, and a great help to the desk attendant.

Also Mr. Joseph Sheehan, from the estate of Judge Osborne, has given to the library, a set, 30 volumes — of Encyclopedia Britannica. A very valuable work.

We have received from Mr. Daniel French an oil portrait of Dr. Samuel A. Orr, who is well remembered by many of the town's people. This has been given prominent place in the reading room.

Mrs. Edward Holbrook of New York, a sister of the late Mrs. Aaron Hobart, sent to the library in the early Fall, two boxes of books, 45 volumes. This act was highly appreciated not only because it furnished reading for our patrons, but the interest shown in the library by one who has not visited our town for many years, is very helpful and encouraging to the Trustees.

In addition to the rules printed in last year's report, the following have been added. That no books shall be allowed to be taken into the Sanatorium buildings, and no book can be circulated where there is a contagious disease.

As we have done heretofore, we print with this report a complete list of books added to the library during 1910.

The deceased treasurer's accounts show that he had received for the library as follows,

Balance from 1909	\$85 10
Town Appropriation for 1910	800 00
Drawn from Hobart fund	103 68
Rust fund, income from	80 00
Kennon fund, income from	20 20

Librarian's Report

To the President and Board of Trustees of the East Bridgewater Public Library :

I herewith submit the annual report of the East Bridgewater Public Library for the year ending December 31, 1910.

The year just closed has been one of unusual activity. The chief item of interest is the circulation. The year 1909 showed the largest circulation in the history of the Library and 1910 exceeded 1909.

In accordance with recent custom the details of the library's activities are arranged alphabetically by subject.

ACCESSIONS

During the year 367 volumes have been added to the library : 251 by purchase, 33 by gift : 23 by binding periodicals and pamphlets.

BINDING

Number of volumes bound	51
Number of periodicals	15
Number of pamphlets	6

BOOKS LENT

The library was open for the circulation of books 188 days in 1910.

The number of volumes lent for home and school use was 14,529. The largest monthly circulation was in October when 1403 books left the library.

Divided according to classes the circulation was as follows:—

Fiction	7647	52.61+
Junior Fiction	4356	30.00
Biography	189	1.30
History	130	.89
Travel	215	1.41
Art and Science	564	3.88
Literature		
Religion	540	3.71
Magazines	888	6.11
	<hr/> 1,4529	<hr/> 100%

CATALOGUE

The card catalogue has been kept up-to-date. Author, title and subject cards have been written for the 367 volumes added, making 700 cards written and placed in the catalogue during the year.

A list of the books added in 1910 follows this report.

GIFTS

A book-case from the estate of Miss Rust.

A portrait of Dr. Samuel A. Orr, from Mr. D. C. French.

Encyclopaedia Britannica from Mr. Sheehan.

Forty-five works of late fiction from Mrs. Edward Holbrook.

We have received from the Commonwealth Acts and Resolves for 1909.

Manual of the General Court, and the Vital records of the towns of Athol, Bolton, Danvers, Haverhill, Natick, Tisbury, Warren, Wayland and Weymouth.

PERIODICALS

The library subscribes for the following magazines

- American Boy
- Atlantic
- Century
- Child Lore
- * Christian Register
- * Commoner
- * Farm Journal
- Good Housekeeping
- Harper's Monthly
- Harper's Weekly
- Journal of American History
- * Life
- Modern Priscilla
- * New England Homestead
- New England Magazine
- * Our Dumb Animals
- Our Fourfooted Friends
- Outing
- Outlook
- Popular Electricity
- Popular Mechanics
- * Patent Office Gazette

* Donated

* Saturday Evening Post

Scribner's

Society of Mayflower Descendants

World's Work

Youth's Companion

READING ROOM AND REFERENCE WORK

The Reading Room has been well patronized through the year, many evenings in winter all the chairs have been occupied.

Children are learning more and more to bring their school work to the library. The librarian will ordinarily be at liberty to help with reference work from 4 to 5.

There has been a marked increase in the number of books circulated for school reference. Of course this demand depends largely upon the teachers, but in the High Schools and the 8th and 9th grades many volumes have been borrowed.

Practical books for the poultry keeper, the farmer and the mechanic have been purchased, that the tax-payer may feel that what he seeks to learn, about his farm or work, is waiting for him at the library.

The more our voters visit the library and know of its resources, the more willing will they be to further its work by increased appropriations. Without frequent additions of new books interest cannot be maintained. That we had 367 new books in 1910 against 167 five years ago is most gratifying to all.

Co-operation should be the watchword between the public, the school and the library.

* Donated

REGISTRATION

The total number of borrowers registered since the opening of the library June 25, 1884 to January 1, 1911, was 3207. One hundred and one were registered in 1910.

STERECOPIC VIEWS

Two additional sets of views have been purchased, of the Yellowstone Park and Yosemite Valley; the library last year having procured the views of Washington, D. C.

CONCLUSION

As was said last year, is said again. The year has been the biggest in the history of the library; in the number of books circulated, in the number of books catalogued; in the number of visitors to the reading room and in the amount of school and reference work done.

Let there be no backward step in nineteen hundred and eleven.

Respectfully submitted,

LUCY L. SIDDALL,
Librarian.

Books Added in 1910

APPARATUS

At the East Bridgewater Fire Station the apparatus consists of one hose wagon with 750 feet of hose, one hand reel with 550 feet of hose, one ladder truck, one pair double harnesses and five hand fire extinguishers.

At Elmwood we have one hose wagon with 850 feet of hose, one hand reel with 450 feet of hose, one ladder truck and six hand fire extinguishers.

There is one hand reel with 300 feet of hose at E. N. Ward's in Satucket.

Also one hand reel with 350 feet of hose and one hand fire extinguisher at John K. Alexander's on Central street.

THOMAS S. H. ROUNSEVILLE,
FRED A. HOYT, Clerk,
JAMES F. EAGAN.

Paid Ralph A. Quimby	\$300 00
Amount of order drawn by Selectmen	\$300 00

CLEAVELAND A. CHANDLER,
JAMES BRANDLEY,
EDWARD S. WHITMARSH.

Contract for Main Drain

THIS AGREEMENT made this third day of June A. D., 1910, by and between Michael F. Roach of East Bridgewater in the Commonwealth of Massachusetts, hereinafter designated as the Contractor, of the first part, and the Board of Sewer Commissioners of the town of East Bridgewater in said Commonwealth of Massachusetts, hereinafter designated as the Town, of the second part, witnesseth:

That the party of the first part, for the considerations hereinafter mentioned, agrees with the party of the second part to build a surface drain in the said town of East Bridgewater, in Union street from the brook culvert west of Oregon street to Central street, and in Central street from Union street to Hobart's driveway, so called, with the necessary manholes and other appurtenances substantially as shown on the plans prepared by the Town to the lines and grades given on the ground by the Engineer appointed to take charge of the work, and in accordance with the following requirements:

The Contractor to furnish and do all the labor necessary to perform the work, and to furnish all of the materials required with the exception of the pipe.

The work to be done under the supervision of and to the satisfaction of the Engineer, and to conform in every par-

ticular to the requirements of the engineer in regard to the details of construction, the quality of the materials furnished by the Contractor, and the manner of doing the work.

The work to be begun as soon as practicable after the signing of this contract, and to be carried on without interruption until completed.

Preference in the employment of labor to be given to citizens of the town so far as may be consistent with the proper carrying out of the work.

The Contractor to take out all necessary permits, and to comply with all the regulations of the law and of the public authorities in carrying out the work; leave an unobstructed way along public and private ways for travellers, street cars, and teams, and for access to hydrants and to private properties.

Carefully protect and repair any damage caused to sewer, water, gas, or other pipes encountered on the work; support and maintain the car tracks over the line of the trench, and repair any damage to property caused by the work of the contractor,

Maintain through the whole of every night, on or near all places in the public ways obstructed or made unsafe by the work of the Contractor, sufficient lights to protect travellers in such ways from injury, and provide such additional safeguards as may be required for the protection of the public during the progress of the work. Take all responsibility of the work, and bear all losses resulting therefrom, or from the amount, character of, or the method of doing the work, or from the nature of the land or place in or over which the work is done, or from the weather, elements, or other causes; assume the defense of all claims and suits against the town, its agents, or employees, or any of them, arising from any act, omission,

or neglect of the Contractor, his agents, or employees, in doing the work ; and indemnify and save harmless the town, its agents and employees, for all such claims and suits.

Repair all damage to the streets, caused by the work of the Contractor ; leave the streets in proper condition for travel, and upon the completion of the work, if required, restore the surface of the streets to their original condition, as nearly as may be.

And the party of the second part agrees with the party of the first part, in consideration of the faithful performance of the above described work, as specified, to furnish all the pipe required for the work ; to furnish hose and supply the water required for the work, and to pay the party of the first part the sum of \$4,459.60 in partial payments as follows :

The first payment to be made two weeks after the beginning of the work, and subsequent payments to be made at the expiration of every succeeding two weeks during the progress of the work ; payments to be on the basis of 75 per cent. of the cost of labor performed and material furnished by the Contractor during the preceding two weeks ; the final payment to be made upon the completion of the work to the satisfaction of the Engineer, and the settlement of any and all claims against the town, its agents, or employees, on account of the work ; the balance of 25 per cent. to be retained by the Town until such time as these conditions shall have been complied with.

AND IT IS FURTHER AGREED by and between both parties hereto, that in any case of disagreement in reference to the performance of said work, all questions of disagreement shall be referred to the Engineer, and his decision shall be final and binding on both parties to this agreement.

IN WITNESS WHEREOF, we hereunto set our hands and seals on the day and year first above written.

MICHAEL F. ROACH,
CLEAVELAND A. CHANDLER,
JAMES BRANDLEY,
EDWARD SCOTT WHITMARSH,
Sewer Commissioners

Executed in presence of
E. S. WHITMARSH.

East Bridgewater, Mass.,
Aug. 26, 1910.

In consideration of the payment to me, by the town of East Bridgewater, of the amount retained by, and the balance due me from said town for work done under a contract with the town for the construction of surface drains in Union and Central streets, dated June 2, 1910. I hereby agree to maintain said drains for a period of three months from the date hereof, and to remedy any defects which may appear during that period in the work done by me under said contract.

Signed—M. F. ROACH.

AMOUNT EXPENDED

Frost Insecticide Co.	\$165 40	
Tree bolt	75	
Freight	2 43	
Labor and small material	745 46	
	<hr/>	\$914 04

INVENTORY OF TOOLS AND MATERIALS

2 Friend pumps,	1 Hand saw,
2 40-ft extension ladders,	2 24-ft extension ladders,
450 lbs arsenate of lead,	2 Hogsheads,
600-ft hose,	1 hose reel,
1 Long-handled pruner,	2 Short-handled pruners.

W. T. GREENE,
Tree Warden.

Report of the Local Superintendent for Suppressing the Gypsy and Brown Tail Moth.

A thorough scout of the town was made for Brown Tail webs, in the spring of 1910 at which time 410 webs were removed.

In regard to the Gypsy Moths, there were 169 colonies burlaped for caterpillars.

In the different sections, 7,126 burlaps were applied, from which 3,610 larvæ, (caterpillars) were taken.

The past fall of 1910, all the residential and street colonies, with a greater part of the wooded section, has been scouted.

Up to January 1, 1911, there has been destroyed 1,319 egg clusters.

The following is a statement of the receipts and expenditures for the year :

REPORT
OF THE
SCHOOL COMMITTEE
AND
Superintendent of Schools
OF THE TOWN OF
EAST BRIDGEWATER
FOR THE YEAR 1910

ROCKLAND:
THE ROCKLAND STANDARD PUB. CO. PRINT
1911

SCHOOL CALENDAR, 1911

GRADE SCHOOLS

Spring term begins April 3, closes June 9: 10 weeks.

Fall term begins September 5, closes December 15: 15 weeks.

Vacation, Thanksgiving day and day following.

Winter term begins January 1, 1912, closes March 15: 11 weeks.

HIGH SCHOOL

Spring term begins April 3, closes June 23: 12 weeks.

Fall term begins September 5, closes December 22: 16 weeks.

Vacation, Thanksgiving day and day following.

Winter term begins January 1, 1912, closes March 22: 12 weeks.

NO-SCHOOL SIGNALS

In Effect January 9, 1911

Five blasts of the Carver Cotton Gin Company's whistle, eight seconds each, with intervals of fifteen (15) seconds.

The signal blown at 7.30 A. M. closes all schools for all day.

The signal blown at 7.45 A. M. closes all schools for the forenoon, except the High, Pond, and grades five to nine at the Allen school.

The signal blown at 12.45 P. M. closes all schools except the High, Pond and grades five to nine at the Allen school.

Regular meeting of the Committee, every Monday evening of each month, at 8 o'clock at the Committee's office in the Bank building.

Superintendent's office hours—Mondays and Thursdays, schools are in session. Office from 3.30 to 4.30 p. m., when in Allen building.

Report of School Committee

To the Citizens of the Town:—

The School Committee herewith present its annual report for the year ending Dec. 31, 1910.

COMMITTEE

Herbert C. Thorndike	Term expires 1911.
Charles L. Nutter	Term expires 1911.
John E. O'Brien	Term expires 1912.
William H. Taylor	Term expires 1912.
Edward T. Morse	Term expires 1913.
Samuel K. Nutter	Term expires 1913.

ORGANIZATION

Chairman	William H. Taylor
Secretary	Samuel K. Nutter
Treasurer	Edward T. Morse
Prudential Committee	William H. Taylor
Supply Committee	Edward T. Morse

At the March meeting the following truant officers were re-elected:— William T. Greene, George Hudson, Edgar H. Grout, and T. S. H. Rounseville.

The Committees of the three towns of our School district held a joint meeting in April and unanimously reelected Mr. Edgar H. Grout for another year. Mr. Grout has served the

district acceptably since 1903. We repeat the statement in our last report, that his long connection with our schools and consequent knowledge of their needs enables him to speak with assurance along this line, making his report to the committee of great value to all who are interested in our public schools. We earnestly ask that you carefully consider his recommendations found therein.

We have attended to the minor repairs on all the school property, doing only that which we considered necessary for the preservation of the buildings. In this as well as in all our expenditures we have endeavored to exercise strict economy. But the need has been greater than we anticipated at the beginning of the year: hence we have been obliged to exceed the appropriation as shown in the treasurer's report.

A part of the grading around the Northville schoolhouse, that was reported last year as being very necessary has been done. The committee having the privilege of using for filling a part of the stones taken from the ditch, dug for the new water system, made it possible to do this at a moderate expense. The work done is a great improvement, but more is very much needed to complete the job.

The High school buildings have been painted one coat this year. Another coat should be applied in the near future.

The increase of pupils in the town made it necessary at the beginning of the school year to again occupy the Pond school house. This action compelled the committee to refurnish the building, as all the furniture was taken to the Allen school, when the new rooms were opened there. For this there was no appropriation. The opening of this school involved also the hiring of another teacher for which no provision was made.

These items account for a large part of the amount overdrawn, as reported by the Treasurer.

The slate black-boards bought with the appropriation for that purpose, were set in the Pond school room as the old

boards were in a dilapidated condition. We have now only one school room in town not furnished with these boards,—that at Satucket.

The committee wishes to publicly acknowledge at this time a gift of four bubbling drinking fountains from a public spirited native of the town, Mr. Simeon C. Keith Jr. The gift, a valuable one in itself, was still more appreciated because of the fact that it came shortly before the law went into effect, which makes illegal the use of a common drinking cup in public places.

The committee recommend the following appropriations for the year 1911:—

Support of schools	\$10,300 00
Books and supplies	750 00
Incidentals	350 00
Minor repairs	250 00
Transportation	700 00
Medical inspector	75 00
Insurance	180 00
Superintendent of Schools	443 33

Respectfully Submitted,

Edward T. Morse,
 Samuel K. Nutter,
 Herbert C. Thorndike,
 Charles L. Nutter,
 John E. O'Brien,
 William H. Taylor.

Treasurer's Report

East Bridgewater, Jan. 30, 1911.

Nineteenth Annual Report of the Superintendent of Schools

To the School Committee of East Bridgewater, Mass.:

Gentlemen;—

It gives me pleasure to submit for your consideration my eighth annual report.

Table of Statistics, year ending June, 1910 :

Population of East Bridgewater, census 1910	3,363
Gain since state census of 1905	194
Number of schools	17
Number of regular teachers required	19
Number of different regular teachers employed during the school year	23
Number of special teachers	1

SCHOOL CENSUS

	1909	1910
Number of boys between 5 and 15	267	281
Number of girls between 5 and 15	282	295
Total	549	576
Number of boys between 7 and 14	189	207
Number of girls between 7 and 14	205	218
Total	394	425

SCHOOL RECORDS

	Year Ending June 1909	Year Ending June 1910
Number of pupils enrolled	607	611
Number of pupils enrolled between 5 and 15	550	560
Number of pupils enrolled between 7 and 14	368	389
Average membership	561.35	575.79
Average attendance	520.42	541.24
Per cent. of attendance	92.70	94.00
Number of different pupils in attendance during the year	631	641

REVIEW OF THE YEAR

The national census taken the past year shows that the population of East Bridgewater is 3,363 or 194 more than the number given by the state census of 1905, representing a gain of six per cent. Compared with the national census of ten years ago there is a gain of 338, or more than eleven per cent. In these same periods of five and ten years, the per cents of gain in average membership in our schools have been eight and fourteen, respectively.

The average membership for the past year shows a gain of fourteen over that recorded one year ago. The total number of pupils in attendance during the year was 641. The per cent of attendance has risen to 94, the highest recorded in several years. Attention is called at this point to the record of tardiness given in attendance table. The total for the year is 1461, which, with an average membership of 576, makes an average of 2.54 per pupil for the year, a number much higher than it should be. The school at Curtisville has the best record, with an average of only .66 per pupil, while the Beaver primary school has the poorest record. It is noteworthy that but five schools in town have a poorer record than the High school where, if anywhere, we should expect to find a high standard of punctuality. Our teachers throughout the town are making a commendable effort to reduce the number of tardy marks but are hindered in their work by lack of interest and support from the parents, some of whom seem to regard habitual tardiness as no grave matter. Indifference to a pupil's record of attendance, however, is a serious fault and one of which no parent should be guilty, for the habit of punctuality which the school strives to develop in every pupil will prove to be a tremendous asset in after life. To know how to do things well is important, to get them done on time is the key note of success.

The problem of finding teachers adapted to our needs con-

tinues, with little or no hope for relief in the near future. The rapid growth of city population creates a demand for experienced teachers which is met in large measure by preying upon less favored communities. During the past twelve months your superintendent has found and employed no less than twenty-four new teachers for the schools of his district, an average of two each month. When one considers that for each teacher hired, from five to ten candidates must be interviewed and their qualifications considered, one can see that this function of the superintendent forms no inconsiderable part of his regular duties. Since my last annual report was printed, eleven new teachers have been employed for this town alone. Of the teachers who have left us during the past year two resigned to be married and eight were attracted by higher salaries than we could pay. Of the teachers who made up our teaching force two years ago, but six are with us today, and of these six only one has taught in this town more than four years. These facts certainly call for serious consideration, and that at once. In my last report statistics were given to show that our scale of wages is far below the average for the county and the state, a fact which is taken advantage of by superintendents in places but little, if any, larger than East Bridgewater. The appropriation for teachers' wages must continue to increase, not only to enable us to retain our teachers, but to make it possible to find teachers qualified to do the work of our schools.

An important change in the marking system was introduced at the beginning of the fall term. The pass mark in each study was raised from 65 to 70 per cent. and the value of the letters used on the report cards was changed to correspond to the requirements of the new standard. The letter A now represents a mark of 90 to 100 per cent.; B, 80 to 90 per cent.; C, 70 to 80 per cent.; D, anything below 70 per cent. To insure promotion from one grade to the next a

pupil must receive an average of at least 70 per cent. for all of his studies and not less than 50 per cent. in any study.

The enforcement of the compulsory vaccination law, to which reference was made in my last report, has continued through the year with good results. Early in the fall term notice was given that no child under seven years of age would be admitted to school without a certificate to the effect that he had complied with the law. It is the purpose of the committee to continue the enforcement of the law, so that parents who are contemplating sending children to school for the first time next September should see that they are provided with a certificate of successful vaccination, or of lawful exemption.

The test for sight and hearing required by law to be made once each year, was made during the fall term, with the following results: Number of pupils examined, 619; number with defective vision, 41; number with defective hearing, 10; number of parents notified, 30. For information regarding the health conditions in our schools you are referred to the report of the medical inspector which is incorporated with this report.

The state law forbidding the use of the common drinking cup in public institutions applies to school buildings. In compliance with this law the common drinking cup has been removed from all of our schools and sanitary water coolers, with faucet attachment, have taken the place of water pails in those schools not provided with running water. The pupils are providing their own drinking cups.

An increase in school population in the Elmwood and West districts made imperative the transfer of the sixth grade from these schools to some other building. To accommodate these grades and also the overflow from the seventh grade, it was necessary to re-open the Pond school in September. Opening this school made it possible to relieve the situation at Northville.

(CHANGES IN THE AGE AND SCHOOLING CERTIFICATE LAW)

The law in regard to granting age and schooling certificates was amended the past year by inserting the provision that no certificate shall be issued until the person applying for the same "Has received a certificate signed by a physician, as provided in chapter five hundred and two of the acts of the year nineteen hundred and six and acts passed in amendment thereof, or by a physician appointed by the school committee, stating that said minor has been examined by him and in his opinion is in sufficiently sound health and physically able to perform the work which the minor intends to do: provided, however, that the age and schooling certificate may be approved and issued without a physician's certificate if there shall be on file in connection with the public schools a written record in regard to the child's physical condition made within one year and the person authorized to approve said age and schooling certificate after having examined such record, shall certify that in his opinion said minor is in sufficiently sound health and physically able to perform the work which the minor intends to do."

Another enactment provides that "whoever forges, or procures to be forged, or assists in forging a certificate of birth of such minor, and whoever presents or assists in presenting a forged certificate of birth, to a school committee or to the person authorized by law to receive certificates, for the purpose of fraudulently obtaining the school certificate mentioned in section sixty, (age and schooling certificate,) shall be punished by a fine of not less than one hundred nor more than five hundred dollars, or by imprisonment for not less than three months nor more than one year, or by both such fine and imprisonment".

The approval of the age and schooling certificate is based upon the following conditions: (1) A statement of age. The applicant must be at least fourteen years of age and must be

accompanied by a parent, or guardian, who must sign the certificate and, under oath, give the age of the applicant. (2) A satisfactory test made by the person who approves the age and schooling certificate of the ability to read and write. This test is met by an ability to meet at least the requirements for admission to the fourth grade in the public schools. (3) Certification as to health and physical fitness to perform the work indicated. This certificate should be obtained from the school physician after the applicant has had promise of work and before he applies to the superintendent for an age and schooling certificate.

HIGH SCHOOL

During the past five years our High school has suffered from frequent changes in its teaching force. Since 1905 it has had five principals and eight different assistants. So many changes have made it almost impossible to establish a definite policy in the conduct of the school, and have in each case made necessary re-adjustments between teachers and pupils, resulting in loss of time and efficiency. In spite of these unfavorable conditions good work has been done, and the school has been placed on the list of schools approved by the State Board of Education. It is highly desirable that we shall continue to merit this approval, and to this end it is hoped that pupils and parents will co-operate with the teachers in their efforts to raise the standard we have already attained. The standard can be raised but only by willing co-operation. The greatest menace to this or any school is the presence of one or more pupils who are unwilling to conform to reasonable regulations or to make the effort necessary to maintain a creditable standing in their classes. Whether such pupils receive any good from school attendance is a disputed question and is at best extremely problematical; they surely contribute nothing to the welfare of the school.

Your attention is called at this point to the report of the principal and especially to the sections dealing with the subjects of regular and punctual attendance and home study.

Report of the High School Principal

Mr. Edgar H. Grout, Superintendent of Schools, East
Bridgewater, Mass:

I have the honor to submit the annual report of the East Bridgewater High school.

The whole number of pupils enrolled since Sept. 6, 1910, is 74, boys 26, girls 48. The average membership is 70.7, the average attendance, 68.01, the per cent of attendance 96.2. While the attendance as a whole is good it can be improved by a little effort on the part of a few pupils. This irregularity of attendance probably arises from an excess of outside social duties. The old maxim, "Work first and then play" is as true today as it ever was. The pupil who comes to school weary and worn from lack of sleep cannot expect to get the greatest benefit from the school, even if he advances at all. The hours of school life are too valuable to be disregarded.

Absence, tardiness and dismissals should be approved by parents, for very necessary reasons only.

The school work is so planned that it is continuous. The work of each day and week depends upon the work of the preceding days and weeks. If a pupil is absent a day, now and then, he or she soon loses the connection between one day's work and the next, then loses interest, becomes discouraged and leaves school. Regularity of attendance and promptness in meeting school duties produce good habits and good habits once formed attend the child through life.

I wish to call the attention of the parents to the matter of home study on the part of the boys and girls. Our school session each day is only four and one-half hours and the greater part of this time is given to recitation work and instruction. If the pupil has four studies, and some have five, the time left for preparing the next day's work is less than two hours. This is not enough and should be supplemented by at least two hours of careful home study. Doubtless we all believe in a proper amount of play and recreation, but we do not believe in wasting the weeks and months that should be used in study or in some profitable employment. Parents may be sure that the pupil who does not study at home is not doing as good work as he ought in school.

The work of the pupils as a whole is good and a disposition shown to try to do good work, but still there are some who are not doing the work. This comes not from lack of ability, but from an unwillingness on the part of the pupil to devote the time necessary to home study. While the equipment of the school compares favorably with the equipment of similar schools in the state yet there is a lack of apparatus in the science department especially apparatus needed for the teaching of Physics. The school library also needs some additions in the way of reference books. I would recommend that, if possible, next year more apparatus for the laboratory and reference books for the library be purchased.

The work of the year has been one of progress and the thanks of the principal are due to the corps of assistants, to the superintendent and school committee for their co-operation and assistance.

Respectfully submitted,

W. A. WOODWARD,
Principal.

Report of Music Supervisor

To the School Committee, Town of East Bridgewater:

Interest in the study of music among the pupils of the East Bridgewater schools seems to continue, and consequently we are able to make more progress each year than was possible the year before.

The Weaver course of study with a certain definite amount of work planned for each grade, is being used as heretofore.

We are continuing the individual singing and already the good results which are to be achieved from this method can be seen. The children are becoming accustomed to hearing their singing voices just as they have heard their reading voices from the first days of school and are gaining confidence in standing and singing alone.

A supervisor cannot do all the work alone. There must be co-operation on the part of the grade teachers, for to them falls the daily drill work, and I wish to thank all connected with my work for their interest and courtesy.

Respectfully submitted,

ETHEL CLARE GRIMES,
Supervisor of Music.

Report of Medical Inspector

To the School Committee and Superintendent of Schools:

I herewith submit to you my report as Medical Inspector:—

Following is a schedule of diseased conditions found, their number, and the number recommended for treatment:

DISEASES

MOUTH, NOSE AND THROAT

	Total	Advised
	No. treatm't	
Decayed teeth	35	35
Elongated uvula	7	4
Tongue tie	4	4
Adenoids alone	8	8
Adenoids with enlarged tonsils	33	33
Enlarged tonsils alone	69	47
Enlarged turbinates	7	5

EYES

Blepharitis marginalis, inflamed edge of eyelid.	10	10
Conjunctivitis	8	8
Cross eyed	7	7
Recommended glasses		14

EARS

Hardened wax in canal	4	4
Discharge from canal	5	5
Defective hearing	6	6

SKIN

Acne face	10	10
Eczema	7	7
Impetigo contagiosa	3	3

HAIR AND SCALP

Pediculosis	27	27
Sebarrhaea capitis, crusts on scalp	17	17

TUBERCULOSIS

Hunch back	1	
Scrofulosis	3	3

ENLARGED GLANDS

Side of neck	27	27
Thyroid	1	1
Sub tonsilar	12	12

GENERAL DISEASES

Anaemia	3	3
Heart disease	2	2
Deformed face	4	

There is a marked improvement in several schools in the symptoms of lousiness, namely: Elmwood school, where two years ago seventeen cases were found. This year none were found.

There were no cases in Satucket, Curtisville, Pond and Northville schools. Only two cases in Eastville.

I feel that many parents and guardians who have the responsibility of the care and health of the child, do not realize the detriment of enlarged tonsils and adenoids to the physical and mental development of the child. Adenoids are situated in the back part of the nose and upper pharynx and prevent the normal development of the soft tissues and bones in that locality, resulting in a deflected septum, (partition between the nostrils), deformed and enlarged turbinates

(small bones in the nose), thickened mucous membranes inside of the nose.

The bridge of the nose becomes flat, the hard palate high and arched, the mouth deformed. The child is unable to breathe freely through the nose and so breathes through the mouth, constantly drawing into its throat, bronchial tubes and lungs germs, dust and more or less infectious material. The face takes on the adenoid characteristics and the child develops the so called "pigeon chest".

Combine adenoids with enlarged tonsils which nearly fill the throat and you have a serious complication. They lower the child's vitality and lessen its power of resistance to disease. The child has frequent head colds; may develop abscesses in the ears, leading to impairment of hearing; may develop enlarged and scrofulous glands in the neck, rheumatism, etc. The child is more apt to contract diphtheria and other nose and throat diseases. As stated before they hinder and prevent the mental and physical development of the child. The only adequate remedy is their complete removal and the sooner the better before the damage has been done."

Respectfully submitted,

I. I. RICHMOND, M. D.,
Medical Inspector.

January 31, 1911.

Conclusion

The principal subjects considered in this report are as follows:

1. Comparative statistics.
2. Many changes in the teaching force.
3. Change in marking system.
4. Vaccination.
5. Common drinking cup abolished.
6. Pond school re-opened.
7. Changes in the Age and Schooling Certificate law.
8. Basis for approval of Age and Schooling Certificates.
9. High school.
10. Special reports.

Respectfully submittd,

EDGAR HOMER GROUT,
Superintendent of Schools.

East Bridgewater, Mass., February 4, 1911.

Auditor's Report

Auditor's Report For The Year 1911

The books of the Treasurer and Collector have been examined and found to agree with the Auditor's accounts.

The cash on hand as reported by the Treasurer has been verified.

The books of the other officials have also been examined and found correct and the proper amounts paid into the Town Treasury.

The accounts of the following Trust Funds have been examined and found correct and the investments on hand as reported by the Trustees of the various funds:

- Alden Fund
- Crossman and Whitman Fund
- Griffin Fund
- Hobart Fund
- Johnson Fund
- Kennan Fund
- Wms. Latham Fund
- Rust Fund
- Soldiers' Monument Fund

Attention is called to the importance of the different departments as well as individuals, in presenting bills promptly on the dates as requested, early in the year, by both the Board of Selectmen and the Auditor, and also that it be insistently urged that all bills be rendered in duplicate, thereby saving much unnecessary labor in making reports and in checking the monthly comparative statements of the Auditor.

Attention is also called to any premiums received from the sale of bonds or notes, which after deducting cost of issue and certification, must under the law be applied towards the payment of the first note coming due under these loans.

Respectfully submitted,

CHARLES H. KEITH,
Auditor.

At the East Bridgewater Fire Station the apparatus consists of one Hose Wagon, with 725 feet of hose, one hand reel with 550 feet of hose, one ladder truck, one pair double harnesses and seven hand fire extinguishers.

The old ladder truck is stored in what is known as the town barn.

At Elmwood we have one hose wagon with 700 feet of hose, one hand reel with 600 feet of hose, one ladder truck, one hose repairing outfit, six shovels and five hand fire extinguishers.

There is one hand reel with 350 feet of hose at E. N. Ward's at Satucket.

Also one hand reel with 350 feet of hose and one hand fire extinguisher at John K. Alexander's on Central street.

ORGANIZATION

Chairman,	William H. Taylor
Secretary	Clara E. Webber
Treasurer	Clara E. Webber

The year 1911 has been both a busy and prosperous one for the library.

We gladly call your attention to the Librarian's report denoting the large increase in circulation of books the past year, a gain over any previous year of more than 1000 volumes. This shows a growing interest in and appreciation of our Public Library.

We have been able to purchase a larger number of books this year than usual, notwithstanding debts of last year.

In doing this we have endeavored to place in the library interesting and standard works of fiction, travel and ad-

venture, as well as books of real permanent value for reference work and consultation.

A set of Brady's Photographic History of the Civil War in ten volumes has been purchased. This work is unique, as it vividly portrays many incidents of camp life and actual warfare; and thus will be of great interest to all lovers of history, especially perhaps to members of G. A. R.

A child's encyclopedia, in 24 volumes, recently compiled by well known educators, entitled "The Book of Knowledge," also a set of books, "Vocations", have been added. Both of these works are very helpful and instructive to young people.

Our last order of books arrived too late to be catalogued for this report, but will be ready for circulation soon.

The bookshelves are badly crowded. It is impossible to make room on them for more books. New racks at once seem to be an absolute necessity.

We are indebted to Mrs. Rice and Mrs. Neidlinger for gifts of books and magazines. We are ever grateful to be remembered in this way, and would also welcome suggestions at any time regarding books desired.

The Trustees wish to express their appreciation of the interest the late William A. Rust has ever shown in our Library. We remember him with gratitude not only for the recent legacy, a portion of which has been received, but also for his many gifts, and the generous spirit which prompted them.

It is with sincere sympathy we mention our Librarian's serious illness and long absence from her desk. We are glad to report that she is again able to resume her duties. Miss Siddall has had charge of the library for 24 of its 28 years of existence, and has ever met with the complete approval of its Trustees. We realize, as perhaps the public cannot so fully, the deep interest she has ever displayed, and the faithful efficiency with which her duties have been per-

formed. Her thorough knowledge of the books of the Library and its patrons, make her a valuable person for the position.

We also wish to mention the good work done by Miss Helen Spencer and Miss Frances Thorndike, who had charge of the work during Miss Siddall's absence.

The extra expense of a substitute Librarian caused an increased expenditure, which we were not able to fully meet; hence a small deficit.

We wish to call the attention of the patrons of the Library to the great need of care in the use of the books. Many of these are returned showing very careless handling. All the money spent mending and rebinding the books already in the Library, lessens the number of new ones added.

The Trustees recommend the same appropriation as last year for the Library, as we foresee a few extra, but necessary expenditures.

CLARA E. WEBBER
JOSEPHINE D. HARRIS,
MABEL L. HOBART,

JOHN E. O'BRIEN,
CLARENCE LATHBURY,

Librarian's Report

To the Trustees of the East Bridgewater Public Library :

I herewith submit the annual report of the East Bridgewater Public Library for the year ending Dec. 31, 1911.

The total number of volumes in the Library is 6876. During the year 404 were added, 19 were gifts and the remainder were replacements and new titles.

Several valuable purchases have been made, a new illustrated edition of Miss Alcott's books, Sylvester's History of Indian Wars in New England, and many others, as will be seen by an examination of the list of books following this report.

The field of library extension offers great opportunities to a library willing to seize them. It is strongly urged that the privilege be granted of taking out for an extended time all the books one wishes for study. No one who does not want to use them will carry home books of non-fiction, and the borrower will be saved time and annoyance of making trip after trip to the Library, if he is allowed to secure at one time a sufficient amount of material. I have in mind the members of the Waverly club who this winter have been studying German literature.

There are others not members of any club who are investigating a subject and wish to use more than two books at one time.

I recommend the abolishment of an age limit. Every child who is able to read, is able to take care of a book. Many of the books on the juvenile shelves are for child-

ren under ten, the fairy tales and the simple stories. It seems far better for the children to take these books in their own names than to use the parents' card, or those of older brothers or sisters, for they will have the books.

The shelves are in a very crowded condition, and it is often hard to make room for the books. Additional book stacks must be purchased in the near future.

I regret exceedingly my absence from the library the past summer and fall, and thank trustees and public that the opportunity to serve them awaited my return.

Report of the Local Superintendent for Suppressing the Gypsy and Brown Tail Moth for the Year 1911

In the spring of 1911, a thorough scout of the town was made for Brown Tail webs, at which time, 5758 webs were removed.

There were 72 colonies burlaped for the Gypsy moth caterpillars. In these colonies, 2,088 burlaps were applied from which 7,928 caterpillars were taken.

Owing to pleasant weather the past fall of 1911, we were able to complete the scouting, both in the woods and residential colonies.

Up to January 1, 1912 there has been destroyed 1,585 egg clusters.

The following is a statement of the receipts and expenditures for the year.

Labor	\$1,485 44

REPORT
OF THE
SCHOOL COMMITTEE
AND
Superintendent of Schools
OF THE TOWN OF
EAST BRIDGEWATER
FOR THE YEAR 1911

ROCKLAND:
THE ROCKLAND STANDARD PUB. CO. PRINT
1912

SCHOOL CALENDAR, 1912

GRADE SCHOOLS

Spring term begins April 1, closes June 7, 10 weeks.

Fall term begins September 3, closes December 13, 15 weeks.

Vacation, Thanksgiving Day and day following.

Winter term begins December 30, 1912, closes March 14, 11 weeks.

HIGH SCHOOL

Spring term begins April 1, closes June 21, 12 weeks.

Fall term begins September 3, closes December 20, 16 weeks.

Vacation Thanksgiving Day and day following.

Winter term begins December 30, 1912, closes March 21, 12 weeks.

NO-SCHOOL SIGNALS

Five blasts of the Carver Cotton Gin Company's whistle, also the Foundry whistle, eight seconds each, with intervals of fifteen (15) seconds.

The signal blown at 7.30 A. M. closes all schools for all day.

The signal blown at 7.45 A. M. closes all schools for the forenoon, except the High, Pond, and grades five to nine at the Allen School.

The signal blown at 12.45 P. M. closes all schools except the High, Pond and grades five to nine at the Allen School.

Regular meeting of the Committee, every Monday evening of each month, at 8 o'clock at the Committee's office in the Bank building.

Superintendent's office hours—Mondays and Thursdays, when schools are in session. Office hours from 3.30 to 4.30 p. m., in Allen building.

School Committees' Report

To the Citizens of the Town:

The School Committee herewith presents its annual report.

COMMITTEE

Herbert C. Thorndike,	Term expires 1914
Cleaveland A. Chandler,	Term expires 1914
Edward T. Morse,	Term expires 1913
Samuel K. Nutter,	Term expires 1913
John E. O'Brien,	Term expires 1912
William H. Taylor,	Term expires 1912

This committee organized at their March meeting by re-electing the same officers who had served during 1910. The following truant officers were elected on the same date:— Willlam T. Greene, George Hudson, Edgar H. Grout and T. S. H. Rounseville.

The annual joint meeting of the committees of our school district ocured in April. Mr. Edgar H. Grout was again re-elected Superintendent. During the year he has performed the duties of the position in his usual satisfactory manner. Mr. Grout is thoroughly interested in the progress of our schools, and for years has made a careful study of their needs. We think that his suggestions and recommendations made in his report to the committee should be carefully considered by the citizens of the town.

At the beginning of the summer vacation, the Committee inspected all the school buildings, and carefully noted the condition of each. So far as possible we have attended to all minor repairs noted at that time, or that have been brought to our notice since. The roof of the house at Northville and one side of the one at Eastville will need shingling soon. We had these roofs examined and patched this year. So far as we know they do not leak at present.

On the evening of November 13 our High school building was burned.

The committee immediately set about making temporary arrangements to accommodate the school until a new building could be erected. Of the available rooms, the Grand Army hall, although far from ideal, seemed to be the most suitable for the purpose. Accordingly, these rooms were leased, proper furniture put in, all needed books and supplies procured, and the school opened there on the following Monday. We hope a new building adapted to all the needs of the school will be ready for occupancy at the beginning of another school year.

We urge upon the parents and friends, the importance of becoming thoroughly acquainted with the work of the schools.

You are paying your money for their support. You have a right, and should know if that money is wisely spent. There is no better way to judge of the work being accomplished than by frequently visiting the schools. Thus keeping in touch with the teachers and scholars.

We recommend the following appropriations for the ensuing year :

Support of Schools	\$11,400 00
Books and Supplies	750 00
Incidentals	400 00
Minor Repairs	500 00
Transportation	775 00

Medical Inspection	75 00
Insurance	40 00
Superintendent of Schools	443 33

Respectfully submitted,

HERBERT C. THORNDIKE,
CLEAVELAND A. CHANDLER,
EDWARD T. MORSE,
SAMUEL K. NUTTER,
JOHN E. O'BRIEN,
WILLIAM H. TAYLOR.

East Bridgewater, Feb. 1, 1912.

Twentieth Annual Report of the Superintendent of Schools

To the School Committee of East Bridgewater, Mass.

Gentlemen :—

The following report is submitted for your consideration.

TABLE OF STATISTICS, YEAR ENDING JUNE, 1911

Population of East Bridgewater, census 1910	3,363
Number of schools	18
Number of regular teachers required	20
Number of different regular teachers employed during the school year	23
Number of special teachers	1

SCHOOL CENSUS

	1910	1911
Number of boys between 5 and 15	281	303
Number of girls between 5 and 15	295	294
Total	576	597
Number of boys between 7 and 14	207	208
Number of girls between 7 and 14	218	216
Total	425	424

SCHOOL RECORDS

	Year ending June, 1910	Year ending June, 1911
Number of pupils enrolled	611	628
Number of pupils enrolled over 15	51	71
Number of pupils enrolled between 5 and 15	560	557
Number of pupils enrolled between 7 and 14	389	394
Average membership	575.79	597.76
Average attendance	541.24	552.23
Per cent. of attendance	94.00	92.38
Number of different pupils in atten- dance during the year	641	681

ENROLMENT BY GRADES FOR MONTH OF

REVIEW OF THE YEAR

In my last report some space was given to the problem of frequent changes in the teaching force. The problem is still with us, but our new schedule of salaries makes it possible to retain good teachers for a longer term of service. During the calendar year just closed there were seven resignations, four transfers and seven new teachers appointed to the force. For the details of these changes you are referred to the list of teachers given in Appendix B.

Reference to the attendance table will show a low record, 92.38, as compared with that reported last year. This low record is due in a measure to a large amount of sickness among the pupils during the winter term, the attendance for the rest of the year being in most of the schools very commendable. Contagious diseases, in one form or another, interrupt the school work with more or less regularity from year to year. The state law, guarding the health of the pupils, requires that those who have been exposed to certain diseases, as well as those who have actually contracted them, be excluded from school until danger of conveying diseases to others has passed. This very act of safeguarding, while it causes much absence, prevents in a large measure the spread of contagion, and to that extent prevents a still further lowering of attendance. The common cold, but little understood and often neglected, is responsible for much of the absence. Highly contagious, it runs through a family or school, causing inconvenience and loss of time, if not actually weakening the system and making the victim more susceptible to the attacks of other disease germs. Under the best of conditions the school room, especially in the older buildings, is but imperfectly ventilated, though, perhaps, better off in this respect than some of the homes from which the pupils come. We try to teach the

doctrine of fresh air as a means of preserving health, but as long as children are crowded together in the school room and are not quarantined for colds, we must expect a recurrence of the invasion every year as the cold weather comes on.

Occasional absence for insufficient reasons also plays an important part in lowering the record of attendance, and is in reality more serious in its effect upon the individual and the school than are longer periods of absence occasioned by sickness. Each absence makes the next one easier until the pupil needs but the slightest excuse to keep him at home, a slight headache, indisposition, or the desire to shirk some lesson or task assigned. Little by little the pupil loses his grip upon the work of the school, until at last he is hopelessly behind his grade and repetition of the year stares him in the face. This kind of absence is difficult to control, for it acts so insidiously, strikes its roots so deep and has its origin in causes at times difficult to understand or determine. Chief among these may be mentioned misunderstandings between teacher and pupil, failure of the school to meet the needs of the child, outside interests, lack of ambition due sometimes to a conviction that the future has nothing in store for the child, street influence, and, most potent of all, the indifference of one or both parents. Parents and teachers should unite to protect the child against these influences, and especially that of the street, which shows itself in lack of respect for elders and for constituted authority, and in habits and practices which are positively injurious to moral and physical health. Pupils who have been subjected to this influence almost invariably stand low in their classes and are likely to be a source of trouble in school.

The number of tardy marks for the year is about the same as that reported one year ago, but the average per

pupil is slightly less. Here again the influence of the teacher counts for much, but she must have the interested assistance of the parents.

The tests for sight and hearing have been made with the following results: Number of pupils examined, 595; number with defective vision, 30; number with defective hearing, 4; number of parents notified, 31. For information regarding the general health of the pupils you are referred to the report of the medical inspector, which is incorporated with this report. For the benefit of those who have children to enter school next September, the compulsory vaccination law is again quoted in full. "A child who has not been vaccinated shall not be admitted to a public school except upon presentation of a certificate granted for cause stated therein, signed by a regular practicing physician, that he is not a fit subject for vaccination."

A further requirement of the school board from pupils entering school for the first time is a certified statement of date of birth. This requirement can be met by presenting a certificate from the town clerk or the parish priest, or a copy of a town report in which is recorded the date of birth of the child.

COURSE OF STUDY REVISED.

During the summer vacation the courses of study in arithmetic and English were wholly rewritten and revised. Such revision is absolutely necessary from time to time, if the schools are to be kept in line with the demands of the day. The work in arithmetic has been arranged under a minimum requirement plan, and has been simplified by deferring to the upper grades subjects which were formerly taught in the intermediate grades, and by eliminating certain other subjects which have become obsolete in the business world, or for which only the specialist would have any

need. We are striving for a saner treatment of the subject, for greater facility in the simpler processes and in handling small numbers, and for greater accuracy in operations. For the large majority of our pupils the mathematical puzzle has been relegated to the past where it rightfully belongs, while emphasis is laid upon the processes likely to be met with in every-day life.

The course in English has been worked out with considerable attention to detail, and here also an attempt has been made to define a minimum requirement for all the schools. The study of formal grammar is postponed until late in the grades, while emphasis is laid upon an ability to express thought in simple yet forceful language.

The courses in history and physiology are in the process of revision and will undoubtedly be ready before the end of the school year.

AGE AND SCHOOLING CERTIFICATES (WORKING CERTIFICATES.)

It seems necessary to refer again to the subject of working certificates, a matter discussed at some length in my last report, and to emphasize the fact that these certificates cannot be issued to applicants under fourteen years of age, no matter how urgently the plea of necessity may be made. This is a matter in which no discretionary power is given the person authorized to sign the certificate, and he must be satisfied as to the applicant's age before the certificate can be issued. The steps necessary to obtain the certificate are as follows: Obtain from the teacher, or the superintendent, an employment ticket which must be signed by the intending employer. This ticket should then be taken to the school physician, who will sign it, provided the applicant, in the opinion of said physician, is physically able to perform the work which

he intends to do. The applicant, accompanied by a parent, guardian, or custodian, should then apply in person to the superintendent. A certificate of birth, if obtainable, should be presented to satisfy any question that may arise in regard to the applicant's age.

TABLE SHOWING LOCAL TAX FOR SUPPORT OF SCHOOLS

Year	Actual cost to the town for Support of Schools	Appropriation for each \$1,000 of val.	Average member- ship	Cost per pupil in av. mem.
1902	\$10,675.99	\$6.72	491	\$21.74
1903	10,290.24	6.35	534	19.27
1904	10,001.96	6.13	514	19.46
1905	10,673.50	6.38	534	19.99
1906	10,842.50	6.40	533	20.34
1907	10,742.48	6.20	561	19.15
1908	11,298.99	5.75	558	20.24
1909	11,972.36	5.76	561	21.34
1910	12,817.16	6.14	576	22.25
1911	13,813.66	6.15	598	23.09

The above significant table has been compiled for the purpose of presenting to the citizens the actual cost to the town for the support of schools over a period of ten years. The expense column given above includes teachers' salaries, cost of supervision, heating, care of buildings, text books and supplies, transportation, incidentals, in fact, every expense except repairs, insurance, new buildings and furnishings. In the period covered by the above table it will be seen that the average membership of our schools has increased from 491 to 598, a gain of 107 pupils, or more than 21 per cent. The cost per pupil has increased 29 per cent. an amount more than explained by the added cost of

fuel and teachers' salaries. The column of particular significance, however, is that giving the amounts the town has actually appropriated and spent for the support of schools for each thousand dollars of valuation. Ten years ago the amount was \$6.72. At no time since that year has the cost reached that amount, even with the unusual increase in expenditures during the past two years. In other words, the maintenance of the public schools is not so great a burden upon the town today as it was ten years ago, and in only three years of the past ten, has the burden been as light as it is at present.

HIGH SCHOOL

Since the burning of the old High School building on the night of the thirteenth of last November, the question of plans and location for a new building has been uppermost in the minds of the people. An opportunity to provide a thoroughly modern structure has been thrust upon the citizens of the town, an opportunity that should not be thrown away.

The plans for our commercial department have thus far been only tentative and experimental, looking forward to the time when a complete business course, including type-writing, stenography and business English in addition to the studies already given could be offered to the boys and girls of our town. The time has now arrived, and I therefore recommend that provision be made in the new building for expanding our business course so as to include the subjects named above. This recommendation involves the necessity of employing an additional teacher, on part time at least, for the school must continue, as in the past, to prepare for normal schools and colleges in order to comply with the requirements of the state.

To justify such an expenditure of money for equipment and teaching, the course must be made sufficiently exact-

ing in its requirements to commend its graduates to the business world. It should be open only to such pupils as are willing to make the effort necessary to become successful stenographers and bookkeepers, and none should be graduated from it but those whom we can recommend as competent and likely to succeed. It should not be, as business courses sometimes are, a refuge for the lazy pupil who hopes to graduate with the minimum amount of effort.

In the past our boys and girls have been obliged to seek their commercial training in outside schools, at a considerable expense for tuition and car fares. In consequence of this expense, a business training has been denied to some of the brightest and most promising graduates of our Grammar School. This condition of things should no longer exist. From conversations I have had with the patrons of our public schools, I am led to believe that there is a genuine demand for a full business course in the High School, a demand that should be met as soon as the new building is ready for occupancy.

For other matters of interest in regard to the school you are referred to the report of Principal Woodward.

Report of the High School Principal

Mr. Edgar H. Grout, Superintendent of Schools, East
Bridgewater, Mass.:

I have the honor to submit the annual report of the East Bridgewater High School. The whole number of pupils enrolled since Sept. 4, 1911, is 67, boys 35, girls 32. The average membership is 66.22, the average attendance is 63.07, the per cent. of attendance 95.26. At the present time the school has 67 pupils. In June 1911 a class of fourteen pupils was graduated, three of whom are successfully continuing their studies at the Bridgewater Normal School.

Once more I must call the attention of the parents to the matter of regularity of attendance and promptness on the part of the pupils in arriving at school on time in the morning. We are having too much absence and tardiness and I firmly believe that much of it arises from thoughtlessness on the part of the parents and employers. Many of the pupils are sent on errands that with a little planning might well be delayed until afternoon.

Under the present policy of the state the High School is not primarily a fitting school for college, but a school intended to train the boys and girls for useful occupations in life. Nine-tenths of the High School pupils in the state do not go to college, but enter the stores, shops and factories. In many High Schools vocational subjects are given in the course, especially along business or agricultural lines. It would seem to me that the elementary commercial course which we now have in our High school might be extended

to include stenography, typewriting, and some business law so that pupils taking those courses would be able to become wage earners immediately on leaving school without seeking further training at some business school. The details of such a course would necessarily need to be worked out as to subjects and length of time to be given to them.

Many pupils are so situated that they cannot afford to spend four years in the High School and then another year in some commercial school to fit them for work as clerks, stenographers and typewriters, but would spend three or four years in a high school which offered courses which fitted them for positions on leaving school. I would recommend the introduction of a more extended business course as soon as suitable rooms and conveniences can be provided.

Although the loss by fire of our High School building has somewhat handicapped us in our work, especially in the work in the sciences as laboratory facilities are lacking, nevertheless the teachers are striving to keep the work at as high a standard as possible and are meeting with a ready response on the part of most of the pupils. The one aim of the teachers has been to do more and better work for the pupils than ever before.

To the assistant teachers for their efforts and for the aid and co-operation of the superintendent and school committee the principal wishes to express his appreciation.

Respectfully submitted,

W. A. WOODWARD,
Principal

Report of Medical Inspector

To the School Committee and Superintendent of Schools:

I herewith submit my report to you as Medical Inspector:—

DISEASES OF MOUTH, NOSE, THROAT

	Total No.
Decayed teeth	50.
Enlarged tonsils only	75.
Enlarged tonsils with adenoids	40.
Adenoids only	10.
Deviated septum	1.

EYES

Belpharitis marginalis	3
Conjunctivitis	4
Cross eyed	2

EARS

Defective hearing	4
-------------------	---

HAIR AND SCALP

Pediculosis	5
Seborrhea capitis	10

SKIN

Acne	5
------	---

TUBERCULOSIS

Hunch back	1
------------	---

ENLARGED GLANDS

Cervical, side of neck	15
------------------------	----

GENERAL DISEASES

Deformed face	2
Anemia	1

According to the report of last year's Medical Inspection the parents have been more careful in regard to the care of the children's hair and scalp, as only five cases of pediculosis were found. There has been, however a surprising lack of care on the part of both parents and children in respect to the latter's teeth, more cases having been found than last year. The parents as a whole do not seem to appreciate what has been told them heretofore concerning enlarged tonsils and adenoids, that their removal surely benefits the child in that it lessens its susceptibility to certain diseases.

W. B. BANNERMAN, M. D.,
Medical Inspector.

January 31st, 1912.

Conclusion

The following are the principal topics considered in this report.

1. Statistics.
2. Changes in teaching force.
3. Reasons for absence.
4. Revision of the course of study.
5. Age and schooling certificates.
6. Local tax for support of schools.
7. High School—Extension of the business course recommended.
8. Report of High School Principal.
9. Report of the Medical Inspector.

Respectfully submitted,

EDGAR H. GROUT,
Superintendent of Schools.

East Bridgewater, Mass., February 5, 1912.

AGREEMENT

This agreement made and entered into this 2nd day of July, A. D., 1912, by and between the TOWN OF EAST BRIDGEWATER and the EDISON ELECTRIC ILLUMINATING COMPANY OF BROCKTON, Witnesseth:—

THAT the said Town does hereby agree with said Company to provide, install, and maintain free of all cost, charge and expense and to the entire satisfaction and approval of the said Company's Chief Engineer, a fire whistle at the East Bridgewater station of the said Company and also a telephone service which shall be subject to the said Company's use for its general business, as well as for the purposes herein provided. Toll charges, however, and other extra expense incurred by said Company in the use of said telephone on said Company's business in addition to the regular price for the maintenance of said telephone, shall be paid by said Company; and FIRE

CALLS shall at all times have precedence over all other business transacted over said telephone.

The said town shall have the right and privilege to telephone all fire calls to the East Bridgewater Station of the said Company and the said Company agrees to cause said whistle to blow the box or district numbers so telephoned, three times.

Nothing herein contained shall be held to operate as a binding agreement upon the part of said Company to cause said whistle to be blown without failure and should said Company at any time fail to cause said whistle to be blown, for any cause, no responsibility or liability shall attach to said Company for its failure so to do.

The said Company agrees that so long as this agreement continues in force that it will make no charge for blowing said whistle.

The said Company further agrees to cause said whistle to blow one blast each day, as a test of its being in good working order, at the hour of nine o'clock in the forenoon, or at some other hour to be determined by said Company and the Fire Engineers of said town.

The said Company also reserves the right to have said Town remove said whistle from the premises of the said Company, whenever said Company shall require such removal, upon the expiration of thirty days after notice given in writing by said Town to remove said whistle.

IN TESTIMONY WHEREOF the said TOWN OF EAST BRIDGEWATER has caused these presents to be signed, executed and delivered in its name and behalf by its Board of Engineers hereto duly authorized and these presents to be sealed with its corporate seal, and the said EDISON ELECTRIC ILLUMINATING COMPANY

has caused these presents to be signed, sealed, executed and delivered by its Superintendent, all this 2nd day of July, A. D., 1912.

BOARD OF ENGINEERS FOR THE TOWN OF
EAST BRIDGEWATER.

THOMAS S. H. ROUNSEVILLE,
WILLIAM E. MURPHY,
FRED A. HOYT.

THE EDISON ELECTRIC ILLUMINATING COM-
PANY OF BROCKTON,

By F. M. Nelson, Superintendent.

EQUIPMENT

At the East Bridgewater fire station the apparatus consists of one hose wagon with 900 feet of hose, one hand reel with 500 feet of hose, one ladder truck, fully equipped. 12 leather buckets, 6 hand fire extinguishers and 10 lanterns.

At Elmwood we have one hose wagon with 850 feet of hose, one hand reel with 650 feet of hose, one ladder truck, one repairing outfit, six shovels, five hand fire extinguishers and 9 lanterns.

There is one hand reel with 350 feet of hose at E. N. Ward's at Satucket.

Also one hand reel with 350 feet of hose and one hand fire extinguisher at John K. Alexander's on Central street.

The East Brigewater company consists of 29 active members with Michael McHugh as Captain. At Elmwood we have 30 active members with Carl C. Poole as Captain.

In the past year four bell, three whistle and six still alarms have been given, clearly demonstrating that the new system installed the past year is a valuable asset to the department.

It has been found that sills and flooring timbers in each of the fire stations are badly decayed, allowing the buildings to settle from two to four inches. A special appropriation will be asked for in order that repairs can be made.

At present the most difficult problem confronting the department is the lack of horses available at times of fire. The fact that thousands of dollars have been appropriated for six-inch water mains for fire protection in the outlying sections of the town makes it even more difficult and the advisability of installing motor driven apparatus should in our opinion be considered by the voters of the town.

THOMAS S. H. ROUNSEVILLE,
WILLIAM E. MURPHY,
F. A. HOYT.

Engineers of East Bridgewater.

Report of the Local Superintendent for Suppressing the Gypsy and Brown Tail Moth for the Year 1912

A thorough scout of the town was made for Brown Tail webs in the spring of 1912, at which time 13,659 webs were removed.

Of the 179 Gypsy Moth colonies found during the fall scout of 1911, 119 were sprayed with arsenate of lead. In the remaining 60 colonies there were 1,535 burlaps applied, from which 8,625 caterpillars were taken.

During the fall scout of 1912 there has been destroyed 8,930 egg-clusters.

The following is a statement of the receipts and expenditures for the year.

Clara E. Webber	Term expires 1914

ORGANIZATION

Chairman,	William H. Taylor
Secretary,	Clara E. Webber
Treasurer,	Clara E. Webber

The year 1912 has been an unusually satisfactory one to the Trustees.

The gain in circulation of books is considerable, denoting an ever increasing appreciation of our Public Library.

We are glad to announce a branch Library has been established in Northville, where 150 books are being widely circulated to be exchanged every three months. A new book stack has been ordered to relieve the congested condition of the book shelves, and make room for the purchase of new books.

A much needed steam heating plant has been installed insuring comfort both to the Librarian, and those who enjoy the privileges of the reading room.

A portion of the lawn has been regraded.

The Trustees had the pleasure of inviting the public to a reception at the Library in honor of Miss Siddall who has for 25 years served faithfully and efficiently as librarian.

Our thanks are tendered to Mrs. Susan B. Dunphe, who kindly loaned a collection of early sketches and many paintings by the late Francis D. Millett, allowing them to remain on exhibition a week in the Trustees' room.

We are indebted to the following for gifts of books, magazines, etc., to the Library: Mr. Nahum B. Smith of Whitman, Mr. James S. Allen and Mrs. W. L. Morey of Brockton, Mr. Cleaveland A. Chandler of E. Bridgewater. The Woman's Alliance of the First Parish, also to the Legislature for the usual literature received. We wish to call the attention of the patrons of the Library to the great need of care in handling the books as repairing and re-binding books is expensive.

The Trustees regret the resignation of one of their Board, Mrs. Josephine D. Harris, who has for many years been an efficient member.

The Trustees recommend the same appropriation as last year for the Library, as this sum is needed to meet the necessary expenses.

WILLIAM H. TAYLOR.

Librarian's Report

I herewith submit the annual report of the East Bridge-water Public Library for the year ending Dec. 31 1912.

531 The number of volumes in the library Dec. 31, 1912, was 7,149, a net increase of ³⁸²273 for the year; of this number 234 were added by purchase, 13 by gift, and 26 by binding periodicals, 29 were purchased to replace those worn out in service.

The total registration of card holders at the end of the year was 511:

The library was open 187 days for the delivery of books and 16031 were circulated for home use, a daily average of 86. ¹⁸⁰91 +

The circulation compared with that of the previous year shows a net gain of 436; and the circulation of 1911 was the largest in the history of the library. + the library was

The following tables will give, in detail, the monthly circulation and a classification of the books issued. ^{part of} S. Jones

The past year has been a busy one at the library and much has been accomplished.

At the beginning of the year patrons were asked to re-register. It is advised by the American Library Association, "that a new registration be taken at least once in ten years." As our record book covered the whole period of the library's existence, from 1884, more than three-fourths of the three thousand who had signed, were no longer using the library.

It is a pleasure to state that the age limit has been abolished. This is a step in accordance with all up-to-date libraries. Now, any child, under 10 years of age, whose parents or guardians desire it to take books, may do so, upon presentation of a signed blank obtainable at the delivery desk.

All residents of the town over 10 years of age may procure books by signing the record-book, or a requisition blank.

Is it understood that all holders of cards are entitled to take *two* books at a time, provided but one is fiction?

In September one hundred and fifty books were sent to Elm Hall in Northville. The books have been widely circulated among the residents of this section, too remote to visit the library. The books will be exchanged every three months.

A report of the library would be incomplete that made no mention of the school and reference work done.

While the circulation of books for home use represents the largest part of a librarian's activities; not less important is the work done for the schools.

We invite the co-operation of teachers and parents, to the end, that our library may become an important factor in our educational system.

The Librarian expresses her thanks to the members of the Board for their co-operation in the work of the year.

Respectfully submitted,

LUCY L. SIDDALL

Selectmen.

Gas Franchise

OFFICE OF THE BOARD OF SELECTMEN

East Bridgewater, April 17, 1912.

WHEREAS the Brockton Gas Light Company, a corporation duly established under the laws of the Commonwealth of Massachusetts, has applied to the Board of Selectmen of the town of East Bridgewater, for the right of said corporation to lay and maintain pipes through the streets, lanes, alleys, and highways of the said town of East Bridgewater, for the distribution of gas to the citizens and others of said town; and

WHEREAS said Brockton Gas Light Company agrees in consideration of the privileges applied for, that it will lay all its pipes both for mains and service, so as not to interfere with any sewerage, water pipes or public driveways, that it will exonerate, indemnify and save harmless, the town against any law suits for damages which might be brought for accidents or other causes which might occur by reason of the construction, installation and maintenance of the said gas service, that it will not open more than a reasonable length of street for mains or service pipes at any one time; and that it will refill the trenches in a proper and substantial manner and will leave such part of the streets, on which work is done under this fran-

chise, in as good condition for public travel as were the same before the opening and occupancy aforesaid; and

WHEREAS NOTICE has been given, and a public hearing has been held on the 29th day of January, 1912, and after due consideration, the said Board of Selectmen has determined to grant the privileges asked for in said application;

NOW THEREFORE the said Board of Selectmen hereby gives consent to the said Brockton Gas Light Company to lay and maintain pipes through the streets, lanes, alleys and highways of said town, for the distribution of gas, and for no other purpose, to the citizens and others of said town.

This consent is subject, however, to the conditions, regulations, provisions and restrictions hereinafter set forth and to such other reasonable conditions, regulations, provisions and restrictions as may from time to time hereafter be made by the Selectmen of the town of East Bridgewater in reference to the construction, installation and maintenance of the gas service herein provided for.

CONDITIONS, REGULATIONS, PROVISIONS AND RESTRICTIONS.

1. Before exercising any of the privileges herein given, said Company shall file with the Board of Selectmen a plan showing the streets, lanes, alleys and highways, and the portions of the same, in which said Company proposes, in the first instance, to lay and maintain pipes for the purposes above stated, which plan shall provide for the laying of gas mains in all the streets and parts of streets that are delineated (in red) on a plan or map of East

Bridgewater, submitted by the Brockton Gas Company, dated 1912, and the Company shall lay gas pipes and furnish gas to citizens and others on the streets and parts of the streets as shown on the said plan. None of this initial work shall be done under this consent until the said plan has been approved by the Board of Selectmen in writing endorsed thereon. Whenever the Company shall hereafter from time to time extend the pipes shown in said initial plan or lay pipes in other streets, lanes, alleys and highways than those shown on said plan, it shall before entering upon such work, file with the Board of Selectmen a plan showing such proposed extensions and additional piping, and shall not do any work on such extensions or additional piping until the plan thereof, so filed, has been approved by the Board of Selectmen, in writing endorsed thereon.

2. Said Company shall lay its pipes both for mains and service so as not to interfere with any sewerage or other pipes and so as not to interfere any further than is reasonably necessary, with driving or other public use of such streets, lanes, alleys and highways.

3. Said Company shall refill the trenches in a proper and substantial manner and shall save and replace in position any block pavement, macadam, gravel or whatever the street's surface might be before said gas pipe was laid, in a manner satisfactory to the Selectmen or Highway Surveyor.

4. In the event that changes in the public ways are determined by the Selectmen to be necessary, or such changes are voted by the town, or damages are caused to the pipes or property of said company in the prosecution

of the busniess of said town or any department thereof, said town shall not be liable for such damages unless wholly and directly caused by the negligence of said town, its agents or employees, and the Company shall, if required by the Board of Selectmen or Highway Surveyor conform to said changes in the location of its pipes at its own expense.

5. Said Company shall give preference to town teamsters and town laborers if such teamsters and laborers care to enter the employ of said company. Town teamsters when employed shall receive not less than \$3.50 per day of nine hours for one-horse team and driver, and not less than \$5.00 per day of nine hours for two-horse team and driver. Town laborers when employed by the company shall receive not less than \$2.25 per day of nine hours.

6. Rights and privileges herein given are upon the express condition that construction by said Company shall begin within thirty days after the date of the acceptance of this franchise by said Company and proceed with due diligence and continuously (except so far as weather conditions, strikes, and other unavoidable casualties shall prevent) until the work is substantially completed. Said Company agrees that the work set forth in the initial plan to be file under paragraph 1 hereinbefore contained shall be substantially completed by May 1st, 1913, and that it will be prepared to supply gas through said pipes on or before said last mentioned date.

7. This consent shall not be valid until it is accepted in writing by said Company, and such acceptance is filed with the Board of Selectmen of said town, with an attested copy

of the vote of the corporation showing the official signing was duly authorized thereto.

8. In exercising the privileges under this agreement, said Company shall comply with all provisions of law relating to gas companies.

Nothing herein contained shall be construed as in any way affecting the right of the consumer of gas supplied by said Company to petition the Board of Gas and Electric Light Commissioners, for the determination of any matters affecting the supply of gas by said Company.

9. If the Board of Selectmen elect, an Inspector may be appointed by them to inspect the laying of the pipes, and to act during the general construction of the work, and to make such report to said Board, one-half of compensation of such Inspector to be paid by the town, and one-half by said Company.

10. The net price of gas to consumers shall not exceed \$1.25 per thousand cubic feet, and the said Company agrees to reduce the price of gas in East Bridgewater by the amount of five (5) cents per thousand cubic feet on April 1, 1915. And the Company further agrees that after said date the price of gas in East Bridgewater shall not exceed the price therefor in the City of Brockton by more than fifteen cents (15 cents) per thousand cubic feet.

11. The acceptance of this consent and permit shall be understood and held to be an agreement by said Company to comply with all the terms thereof, and to exonerate, and save harmless the town for and against all losses, damages, injuries, suits and actions at law or in equity arising by reason of the construction, installation, maintenance or

operation of said gas service or any part thereof caused by any act or negligence of said Company, its agents, or servants.

SEAL

EZRA S. WHITMARSH,

FRED P. WHITMARSH,

ARTHUR C. CHURCHILL,

Selectmen of the Town of
East Bridgewater.

Boston, Mass., July 23, 1912.

At a meeting of the Board of Directors of the Brockton Gas Light Co., a majority being present, the following vote was passed:

That Micajah P. Clough, the Treasurer of the Brockton Gas Light Co., is hereby authorized in its name and behalf to accept in writing the written consents or franchise given by the Boards of Selectmen of the Towns of Bridgewater, East Bridgewater and West Bridgewater respectively, authorizing the Brockton Gas Light Co., to lay and maintain pipes in the streets, lanes, alleys and highways of said towns.

A true copy of record,

Clerk.

Electric Express

To the Honorable Selectmen of the Town of East Bridgewater:

Respectfully represents the Bay State Street Railway Company, that:—

1. Said Bay State Street Railway Company is a street railway corporation, organized under the laws of the Commonwealth of Massachusetts and owning and operating a street railway in the Town of East Bridgewater and elsewhere in said Commonwealth.

2. By the provision of Chapter 402 of the Acts of the year 1907, said company is authorized to act as a common carrier of newspapers, baggage, express matter and freight in such cases, upon such parts of its railway and to such extent in said town of East Bridgewater as the Honorable Selectmen of said town and the Honorable Board of Railroad Commissioners shall by order approve.

3. Said Company desires that the Honorable Selectmen of East Bridgewater, will approve of its acting as a common carrier of newspapers, baggage, express matter and freight in said town of East Bridgewater, in the cases, upon such parts of its railway, to the extent and in the manner hereinafter set forth.

Wherefore the Bay State Street Railway Company respectfully petitions the Honorable Selectmen of East Bridgewater to approve of said Bay State Street Railway Company, acting as a common carrier of newspapers, baggage, express matter and freight in the said town of East Bridgewater its right to act as such common carrier to be subject to termination only by revocation as by statutes provided and to be subject to such only of the regulations and restrictions made by the Honorable Selectmen of East Bridgewater, whether designated as regulations, restrictions, conditions, or by any other name, as shall be approved by the Honorable Board of Railroad Commissioners in, along, and upon those streets and highways in said town of East Bridgewater wherein is located and maintained the street railway of our petitioner, to the extent and to the extent only of carrying and transporting such kinds of packages, parcels, goods and merchandise, of such size, bulk, weight and dimensions as shall be approved by the Honorable Board of Railroad Commissioners, exclusive however, of such articles and commodities, the transportation of which shall from time to time be prohibited by the Honorable Board of Railroad Commissioners or deemed by your petitioner (with the approval of the Honorable Board of Railroad Commissioners) or by the Honorable Board of Railroad Commissioners, likely to interfere with the conduct of your petitioners business as a common carrier of passengers.

BAY STATE STREET RAILWAY COMPANY,

By O. F. SULLIVAN,

President.

Boston, Mass., Aug. 16th, 1911.

November 1, 1911.

Upon the petition of the Bay State Street Railway Company (formerly named Boston and Northern Street Railway Company) after public notices and a hearing, it being determined that public necessity and convenience require the granting of such a petition, it is

Ordered, that the Bay State Street Railway Company be and it hereby is, granted authority to act as a common carrier of newspapers, baggage, express matters and freight in, along and upon those streets and highways in the Town of East Bridgewater, wherein is located and maintained the street railway of said Bay State Street Railway Company, to the extent and to the extent only of carrying and transporting such kinds of packages, parcels, goods and merchandise, of such size, bulk, weight and dimensions, as shall be approved by the Honorable Board of Railroad Commissioners, exclusive, however, of such articles and commodities as shall from time to time be prohibited by or excluded, with the approval of said Honorable Board of Railroad Commissioners, subject, nevertheless, to such regulations and restrictions as in the opinion of said Honorable Board of Railroad Commissioners, public necessity and convenience require, and to such regulations and restrictions as may from time to time be made by the Selectmen and with the approval of the Honorable Board of Railroad Commissioners, and to all provisions of law now or hereinafter enforce relating to common carriers.

EZRA S. WHITMARSH,
ARTHUR C. CHURCHILL,
FRED P. WHITMARSH.

Selectmen of the Town of East Bridgewater.

Regular meetings of the School Committee second Monday of each month at 8 o'clock p. m. at the Town Office in the Bank building.

SUPERINTENDENT'S OFFICE HOURS

Mondays and Thursdays, when schools are in session, at the Allen School.

Hours: 3.30 p. m. to 4.30 p. m.

School Committee's Report.

To the Citizens of the Town:

The School Committee herewith presents its annual report.

COMMITTEE

John E. O'Brien	Term expires 1915
William H. Taylor	Term expires 1915
Herbert C. Thorndike	Term expires 1914
Cleaveland A. Chandler	Term expires 1914
Edward T. Morse	Term expires 1913
Samuel K. Nutter	Term expires 1913

This Committee organized at their March meeting by re-electing the same officers and sub-committees who had served during 1911. The following have served as truant officers: William T. Greene, George Hudson, Edgar H. Grout and T. S. H. Rounseville.

The committee of the three towns held a joint meeting in April and re-elected Mr. Edgar H. Grout superintendent. In compliance to a new state law, this election was for a term of three years. Mr. Grout's report to the committee follows. We gladly place this report before the citizens of the town, hoping they may read it carefully and con-

sider his statements and suggestions. If you study his statistics you will find that there has been a marked increase in the number of pupils enrolled in the schools of the town. This creates a problem becoming more and more difficult to solve; that of so arranging the grades, that all may have the very best school accommodations possible.

In November the State Board of Education removed the town of Raynham from our union, placing it on another district, so that now our district comprises only the two towns, East Bridgewater and West Bridgewater. This is a benefit to our town, as it gives us more of the Superintendent's time, with very little added expense.

The Elmwood school house has been shingled this year. The walls of all the rooms in the Allen building have been tinted and the ceilings whitened, making the inside of the house very attractive. This was a work very much needed. Also minor repairs on all the school property have been attended to as far as possible. There is much work, however, on this line that should be done another year.

We recommend the following appropriations for the ensuing year:

Support of Schools	\$11,700 00
Books and Supplies	850 00
Incidentals	400 00
Minor Repairs	500 00
Superintendent's Salary	475 00

Medical Inspection	75 00
Transportation	800 00
Insurance	

Respectfully submitted,

EDWARD T. MORSE,
SAMUEL K. NUTTER,
HERBERT C. THORNDIKE,
CLEAVELAND A. CHANDLER,
JOHN E. O'BRIEN,
WILLIAM H. TAYLOR.

EDWARD T. MORSE,
Treasurer.

East Bridgewater, Jan. 25, 1913

Twenty-First Annual Report of The Superintendent of Schools.

To the School Committee of East Bridgewater, Mass.:

Gentlemen:

The following report is presented for your consideration and that of the citizens of the town:

TABLE OF STATISTICS, YEAR ENDING JUNE, 1912.

Population of East Bridgewater, census 1910	3,363
Number of schools	18
Number of regular teachers required	20
Number of different regular teachers employed during the school year	23
Number of special teachers	1

SCHOOL CENSUS

	1911	1912
Number of boys between 5 and 15	303	327
Number of girls between 5 and 15	294	298
Total	597	625

Number of boys between 7 and 14	208	223
Number of girls between 7 and 14	216	216
	<hr/>	<hr/>
Total	424	439

SCHOOL RECORDS

	Year Ending June, 1911	Year Ending June, 1912
Number of pupils enrolled	628	624
Number of pupils enrolled over 15	71	66
Number of pupils enrolled between 7 and 14	394	409
Average membership	598	604
Average attendance	552	561
Per cent. of attendance	92	93
Number of different pupils in attend- ance during year	681	675
Aggregate number of months kept by all the schools	155m 4d	157m 15d
Average number of months kept by each school	8m 12d	8m 15d

During the calendar year just closed there have been six resignations, only two of which took effect during term time. Seven new teachers have been appointed to the force, making a gain of one over the number in service a year ago. The details of these changes will be found in Appendix B.

Enrolment Jan. 1, 1912	88	68	88	76	64	52	40	42	41	32	10	13	12	0 618

From the preceding table of enrolment it will be seen that the membership for January of the present year is 667, or 49 more than it was one year ago. This increase has seriously taxed our school accommodations,

especially at the Elmwood, West and Allen buildings. The Pond school, used as an overflow building, has not been large enough to accommodate all of the pupils transferred from the Elmwood and West schools, some of whom we have provided for at the Allen school. This expedient of affording relief by transfer, especially of the intermediate grades, is not wholly satisfactory, but must be employed until additional accommodations can be provided in the Elmwood and West districts.

At the Allen building we have again divided the first grade into two sections, one of which attends school in the morning, the other in the afternoon. This part-time schedule for the first grade has worked out to the advantage of the pupils concerned, I believe, as their progress in school work is fully as marked as under the old system. The teacher has more time for individual work and for giving help at a time when it is most needed by the pupil. Concentrated attention made necessary by the plan results in more studious habits and, finally, the health of the pupil is concerned.

From a study of the above table of enrolment it seems probable that by next September we shall be seriously crowded at the Allen school as well as at the Elmwood and West schools. This congestion at the Allen school can be relieved for a time by the transfer of a grade to one of the rooms in the new high school building. Relief for the other two schools can be obtained only by providing additional rooms. This matter should receive your serious consideration in the near future.

Since September we have been endeavoring to secure more regular attendance by awarding certificates each school month to those pupils who have been neither absent

nor tardy for the given month. At the end of the year it is our intention to give larger and more attractive certificates to such pupils as have earned seven of the smaller kind. Whatever may be said against this form of recognizing efforts to acquire habits of regularity and punctuality, there is much to be said in its favor. The children are certainly interested, and we are seeing results. The danger of over stimulation is lessened by the fact that though a pupil may be absent one or more days during one month, he still has a chance of winning the large certificate, provided absence occurs in not more than two of the nine school months and his record is correspondingly free from tardy marks.

The annual tests for defective sight and hearing have been made with the following results: Number of pupils examined, 608; number with defective vision, 25; number with defective hearing, 11; number of parents notified, 29. The report of the medical inspector is incorporated with this report and will be found on a subsequent page.

The compulsory vaccination law is again quoted in full for the benefit of parents having children to enter school next September. "A child who has not been vaccinated shall not be admitted to a public school except upon presentation of a certificate granted for cause stated therein, signed by a regular practising physician, that he is not a fit subject for vaccination." This is not a local ordinance as some suppose, but a state law, and its enforcement is a matter of necessity and not of local option.

The past year has been marked by an important change in the method of keeping school records in the grades below the high school. A so-called "life card" is kept at the school for each pupil with a duplicate card for the office

file. These cards record such information as the name of the pupil and of his parent or guardian, the certified date of birth, and the facts in regard to vaccination, health, conduct, scholarship and regularity of attendance. This card, with its duplicate office card, is filled in once each year, or oftener in case of transfer, and becomes a valuable record of the entire school life of the pupil. The record will give successive teachers such information as should be in their possession before taking a new class, will be a guide in cases of doubtful promotion and will simplify the process of issuing age and schooling certificates to boys and girls who may wish to go to work. Much time has been lost in the past and inconvenience occasioned by uncertainty as to the real age of our pupils. This inconvenience is practically a thing of the past, as we now have a record of the certified date of birth of nearly every school child in town, whether born here or elsewhere. The task of collecting this information has taxed our teachers heavily the past few months, but they have done their part cheerfully and well. In the future, parents will be expected to furnish the desired information as their children enter school for the first time. Town reports giving the date of birth, town clerks' certificates, baptismal records and passports will all be accepted as sufficient evidence of the correct date of birth.

PRACTICAL ARTS

During the past year we have attempted to make our schools serve the needs of the community more fully by introducing a course in practical arts. Under this designation may be included a wide range of useful occupations

such as sewing, the care and repair of articles of furniture and household belongings, glazing, varnishing, cane-seating, etc., etc. Definite time has been set apart for this course and each teacher has developed it according to her ability and opportunity. The work done at the Allen school may be taken as an illustration of what we are trying to do in this course. The building contains 250 desks and chairs. Most of these desks had lost their polish from long use, many were scratched and some were badly marred and cut. The suggestion was made at first to three or four pupils that they might improve the appearance of their desks, by redressing them. All traces of scratches and cuts were removed by scraping and sand-papering the desks. They were then stained and varnished. So successful were these first pupils that others wished to try the same experiment. Before the end of the school year in June more than 200 desks had been put in good condition, many of them looking as though they had just come from the factory. Much credit is due the teachers for their enthusiasm in directing this work, all of which was done by the pupils themselves. It has been a splendid object lesson in teaching the pupils to care for their school furniture. The same work was carried on with success in some of the other schools in town.

HISTORY

Our work in history for the grades has been materially enriched this year by adopting the course outlined in the famous report made to the American Historical Association by the so-called Committee of Eight. A foundation for subsequent study is laid in the first four grades by the study of primitive life and of the historical background

of certain public holidays; some attention is also given to the heroes of other times and countries than our own. In grades five and six we cover the whole field of American history in a simple manner, making the work largely biographical in character. The time of grade seven is devoted to an elementary study of ancient and European history as a background for the deeper and broader study of American history in grades eight and nine.

SCHOOL SAVINGS BANK

On petition of the School Board the East Bridgewater Savings Bank has established a branch at the Allen school, which has been in operation since the first of last October. Four schools in the building, together with the Pond school, constitute what is known today as the Allen School Savings Bank.

The bank is open for business every Monday morning at nine o'clock, at which time deposits are received and payments made, each teacher acting as bookkeeper for her own room. Deposits and payments are entered in the pupils' pass books, each teacher keeping a duplicate account in a book provided for this purpose. The principal of the building is the recognized head of the school bank and as trustee deposits in the local bank the amount of each day's deposits.

When any account amounts to three dollars it is transferred from the school bank to the Savings Bank and a deposit book is issued in the pupil's name.

The bank has made a successful beginning and its privileges will undoubtedly be extended to other schools as soon as proper arrangements can be made. The report for the first quarter follows:

Bank opened for business Monday, Oct. 7, 1912	
Number of accounts opened during the quarter	105
Amount of deposits for the quarter	\$218.92
Number of accounts transferred to the East	
Bridgewater Savings Bank	26
Number of accounts closed	3
Amount of withdrawals	\$8.95

TABLE SHOWING LOCAL TAX FOR SUPPORT OF SCHOOLS.

Year	Assessed Valuation of Town	Tax Rate	Actual Cost to the Town for Support of Schools	Appro- priation for each \$1000 of val.	Average Member- ship	Cost per pupil in average mem- bership
1902	\$1,589,606	\$18.00	\$10,675.99	\$6.72	491	\$21.74
1903	1,620,176	18.00	10,290.24	6.35	534	19.27
1904	1,630,916	18.00	10,001.96	6.13	514	19.46
1905	1,677,102	17.20	10,673.50	6.38	534	19.99
1906	1,693,055	17.50	10,842.50	6.40	533	20.34
1907	1,733,646	18.00	10,742.48	6.20	561	19.15
1908	1,965,410	18.50	11,298.99	5.75	558	20.24
1909	2,078,620	18.30	11,972.36	5.76	561	21.34
1910	2,087,387	18.40	12,817.16	6.19	576	22.25
1911	2,243,721	19.40	13,813.66	6.15	598	23.09
1912	2,257,623	19.50	15,083.12	6.68	604	24.97

Special attention is called to the above table as it presents in a concise form important information in regard to school finances since the year 1902. From the table we learn that while the assessed valuation of the town has increased 42 per cent. during the period under consideration, the cost for support of schools has increased only 41 per cent. This fact is shown in another form in column five, where we have given the amount of money appropriated and spent on each thousand dollars of assessed valuation for the support of schools. In 1902 this sum

was \$6.72, dropping to \$5.75 in 1908 when there was a large increase in valuation. The past year it has risen to \$6.68, an increase of fifty-three cents over 1911. Reference to the table, however, will show that for this same period the increase in valuation was very small. In spite of this increase, the fact remains that the burden of taxation for support of schools is actually less today than it was in 1902. The meaning of the word "support" has broadened during these years, so that now it includes all school expenses except the cost of new buildings and new furniture. A considerable proportion of the increased cost of the past two or three years is due to the working out of the plan of a sliding scale of wages for our teachers, most of whom have reached the maximum salary, and also to the increased number of teachers employed.

HIGH SCHOOL

The school opened in September with an enrolment of seventy-eight pupils, eleven more than were enrolled the year before. Present indications point to a membership of between eighty and ninety next fall.

The commercial department has been extended the past year by the addition of shorthand, typewriting and penmanship, and the employment of a special teacher for these subjects. This attempt at serving more completely the needs of the community is meeting the approval of those who have in mind a business training for their children. The success of our new enterprise will depend in a large measure upon the willingness of pupils to devote to these subjects the necessary time and work, and upon the encouragement they receive at home.

Pupils in the shorthand course will be given practice

under actual office conditions, and will not be graduated with the stamp of our approval and recommendation until they have attained a reasonable degree of efficiency. A further requirement for our approval is a highly developed sense of responsibility in meeting the obligations of routine office work. The virtues of punctuality, cheerfulness, reliability and tact must be cultivated and reflected in the performance of school duties before we can be satisfied that these same qualities, so essential in the trained stenographer, will become a part of her everyday life in the business world.

Positions of trust and importance today demand, in addition to stenography and typewriting, the broadest general education available. Hence we insist that graduates from this department must have the equivalent of a thorough all-round high school education. We feel that such pupils can be recommended to the business man with a reasonable assurance that they will attain a satisfactory degree of success.

Beginning with next September we should employ our commercial teacher on full time, a step that will be rendered necessary by additional work in the department. It can be justified by the probable increase in the enrolment of the school and by the fact that more satisfactory progress can be made by the pupils.

We have been gratified this year by the return of two recent graduates for work in the commercial department. It is expected that some of the present senior class will enroll next September for the purpose of completing their work in shorthand and typewriting. There seems to be no good reason why graduates of our school should not return, as is the practice in some high schools, or take up

studies for which there was not sufficient time in the four years' course.

The opening of our new building will make possible a line of work for which the town should make provision next year. A considerable number of our young people leave school at fourteen years of age, either from the necessity of becoming wage earners or from a desire to become independent. Realizing later in life their misfortune, or the mistake they have made in going to work so young, they express to me their wish that opportunities were open to them for going on with their studies in a night school. These opportunities could be provided at a comparatively small cost, and any money so invested would pay dividends in higher ideals and better citizenship for our community.

For statistics and other information in regard to the high school you are referred to the report of the principal.

Report of the High School Principal

*Mr. Edgar H. Grout, Superintendent of Schools, East
Bridgewater, Mass.*

I hereby respectfully submit my report for the East Bridgewater High School for the current year. Since Sept. 3, 1912, there have been enrolled 78 pupils, 33 boys and 45 girls. The average membership is 74.56, the average attendance 72.61 and the per cent. of attendance 97.41. Three pupils have left town since the middle of the fall term. There have been 180 absences and 183 cases of tardiness.

As pupils do not have naturally that appreciation for education that will come to them later, parents and teachers ought the more eagerly to co-operate to secure regularity of attendance both as a means of retaining interest and as an emphasis upon the importance of school work.

Through the courtesy of the Bridgewater High School the classes in Chemistry and Physics have had the use of a laboratory one afternoon each week. This has greatly reduced the inconvenience due to our present lack of equipment.

Fifty-three pupils have been enrolled in the Commercial Department. Courses are now offered in penmanship, business arithmetic, book-keeping, shorthand and type-

writing. Miss Gladys Jennison, the Commercial teacher, has inaugurated this work with tact and efficiency. Owing to her present illness Miss Carriè Darling is serving as her substitute. The work is moving on with the same efficiency and without any break. This fact emphasizes both the essential continuity of method for the course adopted for this school and the earnest spirit with which the classes have grasped their new opportunities.

High School graduates with a business training are finding it increasingly possible to compete with the graduates of Business Colleges. Training for positions of trust and responsibility should include such general knowledge as a four years course has to offer. At the same time it is possible to combine the work so as to include in one course both the general education that modern life demands and an entirely adequate training in business technique.

Established precedent calls for continuing one's education away from home. Aside from the usual lack of opportunities at home, there is an added respect for advantages which must be won at a greater cost of time and money. To the graduate who desires drill in the courses offered, and who will give as much effort here as he would elsewhere, the business course has as much to offer as he would find anywhere.

In view of the greater demands made upon high schools in the way of preparing for definite aims it seems desirable to increase the minimum of 66 points required for graduation. By so doing, work done outside of school, such as music, debating and other literary work, and in time even sewing and cooking, can be brought under directive control and graduation credits given therefor.

It has been the aim of the teachers to help each pupil to

enter with interest and success upon the work of the year. Interest and self respect depend somewhat upon the ability to do things well. While it has not been possible to keep all pupils up to grade in every study, no effort has been spared to that end. The spirit of the school and the earnest efforts put forth are factors in the right direction and give hope that this will not remain an ideal but become a reality. In a school living up to this condition discipline will well nigh take care of itself.

In closing I wish to express my appreciation for the efficient help and co-operation given me at all times by the assistant teachers, the counsel and support of the Superintendent and the plans for a more useful course of study brought to fruition through the efforts of the Superintendent and School Committee.

W. J. NUTTER, Principal.

Report of Medical Inspector

To the School Committee and Superintendent of Schools:

I herewith submit my report to you as Medical Inspector:—

DISEASES OF MOUTH, NOSE AND THROAT

Decayed teeth	55
Enlarged tonsils	98
Enlarged tonsils with adenoids	50
Adenoids only	5
Deviated septum	2

EYES

Blepharitis marginalis	3
Conjunctivitis	2
Cross-eyed	2

EARS

Defective hearing	2
-------------------	---

HAIR AND SCALP

Pediculosis	6
Seborrhea capitis	11

SKIN

Acne	2
------	---

TUBERCULOSIS

Hunchback	1
-----------	---

ENLARGED GLANDS

Cervical, side of neck	10
------------------------	----

GENERAL DISEASES

Deformed face	2
Anemia	2
Impediment in speech	1

The inspection of the schools this year still reveals the fact that the parents or guardians of the children do not take seriously the advice given before, in regard to the removal of tonsils and adenoids, and yet they wonder why their children are often sick or are so backward in their studies. The effect of the removal of adenoids and tonsils on the general health of the child has all been explained in former reports, but I will again state that there is a very marked improvement, mentally and physically. There were more scholars enrolled this year than ever before, hence the increase in number of diseases, especially of the nose and throat. The teeth of the scholars were in worse condition than last year. Parents object to having the "first" teeth filled, but in keeping the "first" teeth in good condition a healthy socket is left for the permanent teeth. The results of lack of care to the teeth in child-

hood may be seen by the great number of young adults who are compelled to wear false teeth.

The condition of lousiness was much improved. No lice were found on the six cases reported but all had nits which were subsequently removed by the parents.

Respectfully submitted

W. B. BANNERMAN,
Medical Inspector.

Summary

Some of the principal topics considered in this report are given below.

1. Statistics.
2. Increase in membership.
3. Certificates for perfect attendance.
4. New method of keeping school records.
5. Practical arts.
6. History course.
7. School savings bank.
8. Local tax burden for support of schools.
9. High school. Extension of commercial course.
10. Evening school recommended.
11. Report of High School Principal.
12. Report of Medical Inspector.

Respectfully submitted,

EDGAR H. GROUT,

Superintendent of Schools.

East Bridgewater, Mass., Feb. 1, 1913.

EQUIPMENT.

At the East Bridgewater fire station the apparatus consists of one Hose Wagon with 950 feet of hose, one hand reel with 400 feet of hose, one Ladder truck with a 50, 35, 30 20, 16 and 12 foot ladder and four 6-ft. ladders, 12 leather buckets, 8 hand fire extinguishers, 11 lanterns, 1 set double harnesses, 4 blankets, 4 nozzles and 3 gates.

At Elmwood we have one Hose Wagon with 750 feet of hose, one hand reel with 550 feet of hose, one Ladder truck with a 40, 26, 20, and 15 foot ladder, two 18-ft. and two 6-ft. ladders, 13 leather buckets, 12 lanterns, 4 nozzles, 3 gates 4 blankets, 8 shovels and one hose repairing outfit.

There is one hand reel with 350 feet of hose at E. N. Ward's at Satucket.

Also one hand reel with 350 feet of hose and one hand fire extinguisher at John K. Alexanders on Central Street.

The old Ladder truck fully equipped with ladders is at the town barn on Union Street.

The department has responded to twelve district and 9 still alarms during the year.

300 feet of hose have been repaired and 250 feet, unfit for fire service, condemned.

Extended fire protection to the outlying districts with hydrants far apart make it necessary that new hose be purchased this year, since 1909 only 600 feet have been bought and in our opinion 1000 feet is needed.

Citizens are earnestly requested to use the word "emergency" when sending in an alarm for fire. Chimney fires should be reported to the fire station nearest your district.

Permits to sell fireworks for July 4th were issued to John Keveny, East Bridgewater; L. A. Flagg, Elmwood; C. H. Richardson, Northville.

THOMAS S. H. ROUNSEVILLE,
WM. E. MURPHY,
FRED A. HOYT,
Engineers of East Bridgewater.

Report of the Trustees of the Public Library.

ORGANIZATION.

Chairman, William H. Taylor,
Secretary, Clara E. Webber.
Treasurer, Clara E. Webber.

The year 1913 has been a most satisfactory one in many ways to the Trustees of the Public Library.

The gain in circulation of books increasing as it does

each year, is an encouraging sign of the appreciation of the public.

Owing to an epidemic of scarlet fever the Library was closed for two weeks, the circulation of books being effected much longer.

The new book stack purchased this year has helped to relieve the congested condition of the book shelves, and is already filled.

In answer to a petition signed by many of the High School pupils, the hours of opening the library have been slightly changed to accommodate their needs.

On Fridays, the Library has opened at one o'clock P. M. closing at 6 o'clock P. M. During the vacation months the Library will keep open as formerly.

The Trustees have slightly increased the Librarians salary this year, realizing the efficiency of her work.

The branch Library established at Northville has been well patronized, the method of distribution however was not entirely satisfactory; therefore it seemed wise to withdraw the books for a short time, expecting to make more permanent arrangements.

The Trustees desire and intend the people of Northville shall enjoy the privileges of the Library in the near future.

Our book allowance being so meagre it will not permit us to purchase many books we would like to see on our shelves, but we have endeavored to meet all demands, to suit all tastes as far as practicable.

We are ever grateful for suggestions regarding the purchase of books, and will gladly furnish material for study and reference work if requested.

A welcome addition to our list of magazines is The Illustrated London News, The Travel Magazine and Boy Life, a Scout magazine.

Owing to litigation the Trustees deemed it expedient to accept a compromise offered by the Executors of the

will of William A. Rust, whereby the amount paid to the Library Trustees will be reduced by not more than twenty per cent.

The Trustees earnestly recommend the same appropriation for the Library as last year, as this sum is actually necessary to cover running expenses.

Respectfully submitted,

JOHN E. O'BRIEN,
MABEL K. HOBART,
HERBERT C. THORNDIKE,
CLARENCE LATHBURY,
WILLIAM H. TAYLOR,
CLARA E. WEBBER.

CLARA E. WEBBER.

Librarian's Report.

I herewith submit the annual report of the East Bridgewater Public Library for the year ending December 31, 1913.

In the year just closed there has been a substantial growth in the book collection, and in the circulation of books for home use.

Of special note among the gifts of the year are 10 books on art study, presented by Mrs. Frank Parker. A gift of 10 volumes was received from Mr. Cleveland A. Chandler, and Mr. W. H. Keith was the donor of 7 volumes. Mrs. Lucia Millet Baxter sent an autograph copy of her interesting book on housekeeping and Mr. Charles Elmer Beals, his work on theology.

SIZE AND GROWTH

The total number of books added was 382, 109 more than the year previous. Of this number 346 were by purchase, 19 by binding periodicals, 17 came to us as gifts, and 28 were re-placements.

CIRCULATION

The circulation for the year shows a total of 17,079, an increase of 410 volumes from the library, and 644 from the branch at Northville.

Ninety-one volumes are the daily average. [see appendix at end of this report.]

The tables show an increased reading of books in biography, travel, and science, due in part from the increased demands of the high school pupils; although it is to be said, that the frequent publication of readable and attractive books, on timely subjects does much to secure a general reading for books along these lines.

There has been some duplication of the best of the newer volumes, but the present supply of recent and popular books comes far from supplying the demands.

SCHOOL WORK

The lists of supplementary reading for high school scholars are posted in the library, and the books have been placed where they can be examined and selected by the pupils.

The high school teachers have taken volumes, allied to subjects taught, and used them to supplement text-books.

Several of the teachers from the grades have kept a number of books in their rooms, and circulated the same among their pupils.

WORK WITH THE CHILDREN

With the revocation of the age limit we find a constantly growing call for children's books. Books for younger children have been procured, and placed on open shelves, which contributes greatly to the free circulation of volumes. Co-operation is bespoken of parents, to the end, that books be carefully handled, as a large item of expense is re-binding.

LIBRARY PRIVILEGES

Do all residents realize that two books may be taken from the library at a time, provided but one is fiction? That books for study, not in sufficient demand to warrant purchasing, may be obtained through the inter-library loan?

The library is anxious that all our citizens shall know its resources. It has material to aid the school, the Grange, the study class, the club and everyone engaged in research, as well as he who reads for pleasure. It aspires to have every resident a card holder, and bespeaks the hearty co-operation of each and all that the library may be a potent force in our community.

The librarian expresses her thanks to the Trustees for their support in the work of the year.

Respectfully submitted,

LUCY L. SIDDALL,
Librarian.

Report of Board of Health for 1913

MEMBERS

Cleaveland A. Chandler	Term expires 1915
Edward S. Whitmarsh	Term expires 1914
William P. Curley	Term expires 1916

Mr. Frank H. Taylor appointed inspector of slaughter house.

The report of inspection is as follows: One hundred, seventy-two (172) swine, four hundred, fifty-four (454) veals, and seven (7) beefs. All of which were in healthy condition with the exception of one hog which was found to have tuberculosis and was buried.

The following diseases were reported and notices sent to the State Board of Health. Scarlet fever, 1; Measles, 3; Whooping Cough, 1; Ophthalmia, 2; Infantile paralysis, 1; Pulmonary Tuberculosis, 49.

Sixty-two (62) burial permits issued during year.

Owing to epidemics of Scarlet Fever and Rabies, the account is much over drawn.

An appropriation of six hundred (600.00) dollars is suggested for next year.

Report of Inspector of Animals

To the officers and citizens of East Bridgewater:

In the 165 stables which I visited during the past year, I have inspected 622 cows, 126 young stock, 18 bulls, 310 swine, 7 sheep and 46 goats, all of which I found to be normal.

I also found 5 dogs affected with rabies and 3 horses affected with glanders, all of these being killed and buried.

Respectfully submitted,

F. H. TAYLOR,

Inspector of Animals.

Report of Local Moth Superintendent for Suppressing the Gypsy and Brown Tail Moths for the Year 1913

The usual scout of the town was made, both in the residential and wooded sections in the fall of 1912. 234 colonies were found to be infested with Gypsy Moths, 8934 egg clusters being destroyed with creosote.

The collecting of Brown Tail webs was begun Jan. 1, 1913, but owing to a shortage of money we were unable to continue the collecting throughout the town, covering about one-half the area and gathering 9420 webs.

In the spring of 1913 the most of the residential colonies were sprayed with arsenate of lead, receiving good results but owing to the fact that some of the colonies were near poultry yards, we were obliged to burlap such colonies to avoid danger of poisoning poultry with the spray, 812 burulaps being applied from which 9491 caterpillars were taken.

During the past fall of 1913 the scouting has included both the creosote treatment on the Gypsy Moth egg clusters and the collecting of Brown Tail webs. Up to the present date three-fourths of the town has been scouted, 40,468 webs being collected and 2,426 egg clusters destroyed.

Following is a statement of the receipts and expenditures for the year:

Street Railway Location

IN BOARD OF SELECTMEN TOWN OF EAST BRIDGEWATER

November 11, 1913.

Upon petition of the Bay State Street Railway Company, dated September 26, 1913, for an alteration and re-location of its tracks in Bedford Street, near the new High School, in said East Bridgewater, with the necessary changes in poles, wires and other appliances connected therewith, as therein petitioned, due notice having been given and hearing held as required by law, it is

ORDERED: That the petition be granted subject to the conditions of the original grant of location in said Bedford Street, subject to the general provisions of law applicable thereto.

The location of track and poles to be as shown on plan of "Maintenance of Way Department" of said Company, on file with this Board, dated Sept. 8, 1913, approved thereon by this Board and made a part of their order.

E. S. WHITMARSH,

F. P. WHITMARSH,

A. C. CHURCHILL,

Selectmen of East Bridgewater.

Electric Light Agreement

THIS AGREEMENT made and entered into this first day of January A. D. 1913, by and between the Town of East Bridgewater, hereinafter known as the Town, a municipal corporation in the Commonwealth of Massachusetts, and the Edison Electric Illuminating Company of Brockton, hereinafter called the Edison Company, a corporation duly established and located at said Brockton in the Commonwealth of Massachusetts.

WITNESSETH:

That the Edison Company under the terms and conditions of this agreement for the term of three years from January 1st, 1913, to furnish to the town of East Bridgewater incandescent street lighting, and the town of East Bridgewater under the terms and conditions of this agreement agrees to pay to the Edison Company for said service as hereinafter specified.

The Edison Company agrees to furnish not less than one hundred (100) incandescent electric lamps now located and ordered by the authorized agents of the Town, and additional incandescent lamps as the Town may require; the additional lamps shall be located as directed by the Town by its authorized representatives or agents, said

lamps to be located not more than four hundred feet from existing lines when additional poles are required, and not more than five hundred feet from existing lines if no additional poles are required.

POLES, FIXTURES, ETC.

The Edison Company shall provide, erect and maintain all necessary poles, wires, apparatus and fixtures needful to maintain the lighting service in an efficient manner, and shall operate and care for all lamps in such a way as to afford first class service.

LAMPS.

The incadescent electric lamps shall be what is known as the forty (40) candle power, series Tungsten lamps, or a lamp of greater efficiency.

Each and every incandescent lamp shall be replaced by new lamps as often as is necessary to insure good service.

All incadescent lamps shall be placed on an iron arm suspended from a pole, unless at prominent places it is found necessary to suspend the lamp over the street to insure proper illumination.

HOURS OF LIGHTING.

The lamps shall be kept lighted at least twenty (20) nights in each month; to wit, nights when there is no moon, from thirty (30) minutes after sunset to one o'clock A. M., and on the remaining nights of the month, from thirty (30) minutes after sunset until one hour after the actual rising of the moon, except nights when the moon is risen before the hour of sunset, in which event said lights shall be lighted at the setting of the moon, if before one o'clock A. M., and kept lighted until one o'clock A. M., and in case of unusual darkness, caused by storm or otherwise, said incandescent lamps shall be put in operation and lighted at sunset.

If, at any time during the term of this contract, the Town desires to add morning lighting to the above schedule, it is agreed that from November 12th to March 4th of each year, the lamps shall be kept lighted from 5.30 A. M. to one half hour before sunrise each and every day.

MAINTENANCE OF LINES AND FIXTURES.

Incase any authorized agent of the Town shall deem any lamp posts, supporting posts or apparatus connected with the lamps or lines to be in a dangerous condition, he shall serve written notice on the Edison Company, stating the defects and requirements. If, within a reasonable time of receipt of such written notice, the Edison Company fails to remedy these defects in a safe and proper manner, then the Town by its authorized agents may make the necessary repairs, alterations and changes, and recover from or deduct necessary expense thereof from any sums thereafter coming due said Company from said Town.

PATROL.

The Edison Company shall maintain a weekly patrol of all the lamps installed under the terms and conditions of this agreement.

CLAIMS AND DAMAGES.

The Edison Company hereby covenants for itself, its successors and assigns to indemnify and save said Town harmless from any and all claims or damages on account of injury to persons or property arising from imperfect or improper insulation of its wires or construction or maintenance of its wires, and from any and all claims or damages by reason of the infringement of any patent right in the use of the Company's lamps, machinery or apparatus by said Town or by said Company on its lighting service

MAP OF LOCATIONS.

The Edison Company shall, when requested by an authorized agent of the Town, provide said Town with one

map of the Town of East Bridgewater whereon the position of each and every light in the service of the lighting of the said Town by said Company shall be plainly shown, also a typewritten list wherein numbers and locations of each light shall be correctly enumerated, the said list to be corrected as often as any change takes place in the number and location of lamps, if so requested by the authorized agent of the Town.

LOCATIONS.

The Town of East Bridgewater covenants and agrees to locate and authorize said company to maintain at least one hundred (100) incandescent electric lamps.

PRICE.

The Edison Company shall furnish and the said Town shall pay for said lamps at the following prices, and agreeable to the terms hereinafter stated:

For not less than one hundred (100) incandescent lamps of forty (40) candle power, and such additional lamps of forty (40) candle power as may be furnished under the terms of this agreement, the Town of East Bridgewater agrees to pay at the rate of Fifteen Dollars and Fifty-two Cents (\$15.52) for each lamp per annum, subject only to deductions for outages as hereinafter stated.

If, during the term of this contract, the Town orders the lamps to be burned in the morning, as provided in the last article under "Hours of Lighting," then the Town agrees to pay for said lamps at the following prices,—

For not less than one hundred (100) incandescent lamps of forty (40) candle power, and such additional lamps of forty (40) candle power as may be furnished under the terms of this agreement, the town of East Bridgewater agrees to pay at the rate of Sixteen Dollars and Two Cents (\$16.02) for each lamp per annum, subject only to deductions for outages as hereinafter stated.

PAYMENTS.

The Town agrees to pay the amounts due for lights maintained and furnished according to the terms of this agreement during the calendar month next preceding on the tenth day of each month.

DEDUCTIONS.

If any lamp or lamps to be furnished and maintained under this contract, and in accordance with the conditions hereof, shall fail to burn during any portions of the stipulated times of burning, one cent (\$.01) per hour for each incandescent lamp thus failing shall be deducted from the sum due the Edison Company, except when lights have been ordered out, or authorization has been given by duly constituted authority of the Town of East Bridgewater to said Company to turn off the current for a short period of time, also excepting the shutting off of the lights due to dangerous storms, in which event the deduction for lights out shall not apply.

Unless any lamp shall continuously fail to be lighted for a length of time exceeding one hour, no allowance shall be made for any outage, and it is further understood and agreed that no deduction shall be made on the failure to burn of lamps which have been broken for a period of twenty-four hours after such time as said broken lamps have been reported to said Edison Company.

No allowance shall be made for outage except on a true written report to said Town made by its police or any person whose business it is or who may be authorized by said Town to overlook and report the condition of said lamps, and on condition that a duplicate of this report be mailed to the Edison Company at its office in Brockton on the date that said report was made to the Town.

TESTS.

The Town may cause to be made by a qualified electrical engineer, at any time such tests to determine the

candle power of the incandescent lights furnished under this agreement as said Town or agent may deem advisable; and if in any one month, any lamp or lamps in the service of said Town shall at two consecutive tests so made show a less number of candle power than is herein stipulated and agreed, the said Town may deduct such sum from any amount due from said Town to said Company, as may be proportionate to the shortage thus found in the candle power herein stipulated and provided for.

CHANGES IN LOCATIONS.

It is mutually agreed that if the Town shall by its authorized agent direct that for reasonable cause existing lamps be changed, renewed or re-located, such change shall be made by the Edison Company at its own expense.

It is further agreed that upon violation or non-performance by the Company of any agreements, stipulations or conditions herein made, stipulated or agreed to be the Edison Company, the Town may forthwith cancel this agreement and bring action upon such Company for breach of any condition thereof, or may at its election bring successive actions upon said Company for breach of any condition thereof without cancelling this agreement, or may obtain satisfaction for violations or breaches according to provisions expressed in this agreement.

IN WITNESS WHEREOF the said parties have caused their corporate seals to be hereto affixed, and these presents to be executed, signed and delivered in their corporate names and behalfs by agents thereto duly empowered and authorized the day and year first above written.

E. S. WHITMARSH,

F. P. WHITMARSH,

A. C. CHURCHILL,

Selectmen of the Town of East Bridgewater.

THE EDISON ELECTRIC ILLUMINATING CO. OF
BROCKTON,

By A. STUART PRATT,

Vice President.

Report of the Board of Water Commissioners

Elected by the voters to take charge of a new department of town business; one which perhaps touches the every day life of our citizens closer than does any other department; and one which differs from other departments, in that its earning capacity must be considered as a factor in its management, we decided at the beginning of the year to feel our way along, keeping the expenses down as well as possible.

For if a standard of large expenses is once established, it will be very difficult to lower it in the future, while if after a few years, the debt is reduced and the income increased, it will be an easy matter to increase the expenditures and thereby insure better service in some respects.

Of course the best condition is to have a Superintendent to devote his entire time to the department, and a Workman in the employ of the town at a weekly wage.

But as this seemed out of the question, at present, on account of the expense, we decided to employ Mr. Wm. T. Greene the Superintendent of Streets, to act also as Superintendent of the Water Department; and to arrange with Mr. Geo. M. Webber to have the services of Mr. Michael Ahearn, a capable and experienced water works man, at any time, in case of breaks or other emergencies.

The salary of \$250.00 paid Mr. Greene covers also the reading of the meters four times a year, twice for billing, and twice for observation, and the reading of those of the larger consumers each month.

The price paid Mr. Webber is \$6.00 per day for man, team and all tools, with \$3.00 per day extra for night and Sunday work.

The price on small repair jobs is seventy cents per hour for man and team, and one dollar per hour for two men and team.

We also contracted with Mr. Webber to install complete new services to the abbuttors street line, at \$12.00 each, he furnishing all material; and to renew the pipe on old services to the same point, at 29 cents per foot for one inch pipe, and 27 cents for three quarter inch pipe, he furnishing pipe.

We appointed Mr. Fred E. Fuller as Collector of Water Rates, his pay to be one per cent. of the amount of bills committed for collection.

INSTALLING NEW METERS.

We decided to purchase Empire Meters of the National Meter Co. at \$10.40 each, and we are trying out two doz. of a cheaper meter, the Keystone, for the purpose of comparison.

We solicited bids on setting meters from the local plumbers as well as from one in Bridgewater, who decided not to bid.

The lowest bidder on setting meters on pipe which entered cellars, was Geo. M. Webber, 90 cents; and the contract was awarded him.

The lowest bidder on Frost proof outside meter wells, where service pipes did not enter cellars, was W. F. Churchill, \$15.00; and the contract was awarded him.

Mr. Churchill afterwards transferred this contract to Mr. Webber with our consent.

As the cost of these outside meter wells was so great, we decided to change over service pipes wherever practicable, so that meters could be set in the cellars.

We decided to meter all services for two reasons; first, that all might be treated alike, and one man would not feel that he was limited to a meter allowance, while his

neighbor was not so limited; and second, to detect waste of water through service leaks.

This latter is a very important matter; for the town is obliged to pay for all water used, and cannot allow waste, unless it is paid for, by those responsible therefor.

As examples; one single faucet service has run off during the last six months an excess, costing at regular rates to consumers, fifteen dollars, wholly from a bad leak in the faucet, which was not attended to.

In another case where the service pipe was wholly underground, the meter detected a leak, showing no water above ground, which ran off about 2400 cubic feet.

We have been lenient in settling for these and other leaks, because we felt that consumers did not realize the waste of water from not attending to them; but after the situation is understood by the people, a change in that policy will be made.

Upon the East Bridgewater System there are less than twenty-five services without meters, and meters will be set upon these in the spring.

QUALITY OF WATER.

During the dry spell last Juuly, we received many complaints from consumers, along mains where there is a good circulation of water, of the extremely bad quality of the water.

The Superintendent of the Bridgewater Water Co. attributed it to the water drawn from the old wells near Sprague's Hill, as the new pumping station was unable to furnish enough water at that time.

Since then more wells have been driven at the new pumping station, and the Chief Engineer of the State Board of Health, in a letter dated Jan. 10, 1914, states that the water of the new wells is of "good quality and safe for domestic use" and "probably an adequate quantity of water will be obtainable there, so that the use of the old wells

except in emergencies can be avoided in the future."

Upon the dead ends of all the systems, where there is no circulation of the water, we are convinced that the water will have to be blown off more frequently than we have done the past season; and when the town becomes able financially to do so, the mains should be extended and connected, so as to do away with as many dead ends as possible; for the water will not be satisfactory during the hot weather without a constant circulation.

WATER RATES.

The rate paid for water to the Bridgewater Water Co., is the same as that paid to the City of Brockton; eight cents per 1000 gallons or six cents 100 cubic feet; while to the Town of West Bridgewater we pay ten cents per thousand gallons.

The rates charged East Bridgewater and East End consumers are; a Minimum Charge of \$5.00 per six months, covering fifty cents meter rent and \$4.50 for water; for which the consumer may use 2000 cubic feet of water. Excess used, from 2000 to 25000 cubic feet is charged for at twenty two and one half cents per 100 cubic feet. Consumers using at the rate of 50,000 cubic feet of over, per year, have their bills rendered quarterly, and are charged fifteen cents per 100 cubic feet on excess over 1000 cubic feet per quarter.

The Beaver Minimum Charge is \$7.00 per six months; for which the consumer may use 2667 cubic feet. On excess over that quantity, the rates are the same as on other systems.

The East End System comprises Northville, Eastville and Curtisville.

East Bridgewater Minimum Charges are payable in advance, while the other systems have been continued as before, payable after the period paid for, has elapsed.

We believe that payment in advance is the proper method. For a water rate is too small to collect by suit at law, and the man who is so inclined, after selling his place, will refuse to pay for water actually used by him, and the rates lost in this way must be paid by honest citizens in their tax bills.

While a definite opinion as to the earning capacity of the East Bridgewater System purchased by the town, cannot be formed until the present rates have covered all seasons of the year, it appears that the income will meet the running expenses, interest charges and a payment on the debt of about five hundred dollars the first year.

The ten dollar meter has reduced the income, apparently, about seven hundred dollars from the previous flat rate income, and the rate of interest rose before the purchase was complete, so that the interest charges call for two hundred and sixty two dollars more the first year, than if the rate had remained at four per cent.

While the interest rate to be paid is four and one quarter per cent., yet a premium was realized sufficient to pay the expenses of the purchase and bond issue, and leave about one thousand dollars to be applied to the debt.

The above statements do not include the income and expenses of operation of the extensions made in 1913.

We recommend that the present rates be continued another year; after which, if a change is desired, we shall have more definite figures than at present, to show what that change shall be.

We desire to commend the consumers for their prompt payment of water rates, and trust that they will continue to do so in the future, each one bearing in mind that the town is trying to supply a public necessity at cost.

We recommend that the town raise and appropriate for hydrant service \$1500.00 to be credited to the East Bridgewater System, \$200.00 to be credited to the East End System and \$150.00 to be credited to the Beaver

System. Also for watering troughs the same amount as has been paid heretofore to the Bridgewater Water Co.

We recomend that the town raise and appropriate for other town departments using water, sums sufficient to cover the value of such water, and that such appropriations be credited to the Water Department.

We have added nine new services upon the mains purchased from the Bridgewater Water Co., and four on the old mains of the East End System.

EXTENSION OF MAINS.

We advertised for bids in the Boston Herald and Providence Journal, sending out specifications to all applicants, but reserving the right to reject any or all bids.

We sent out sixteen copies of specifications and seven of the parties submitted bids.

The bids of A. Williams & Co., C. H. Thornell and Roach-Webber Co. were lowest, in order as above; all being within two hundred dollars of each other in a total bid of over five thousand dolars.

After thoroughly considering the matter we decided to reject all bids.

We then contracted with Roach-Webber Co. to install the work, at a price about fifty dollars above the lowest bid.

We considered that the extra cost of supervision, in dealing with a firm unknown to us, would exceed that amount; and that this method of handling the matter would be cheaper and better for the town in the end.

The prices paid were:

10-inch pipe per linear foot	\$.28 1-2
6-inch pipe per linear foot	.27 1-2
4-inch pipe per linear foot	.20
2-inch pipe per linear foot	.16
1-inch pipe per linear foot	.15
Complete services each	11.40
Rock excavation per cubic yard	3.15

The town to furnish all pipe, hydrants and fittings.

Contractors to furnish lead and jute, and material for complete services from the main to the street line and do all digging, filling and laying. Depth of trenches to be five feet.

The other extensions authorized by later town meetings were contracted to the same firm at the same prices.

We obtained quotations from four firms on Cast Iron Pipe, Hydrants and Fittings and gave the business to R. D. Wood & Co., of Philadelphia, their prices being the lowest.

The amount of ten-inch pipe in stock resulted in part from the eight-inch main extending farther than we thought, and in part from the foundry shipping more than was ordered. We decided to keep the same a few years until it is determined whether the town will continue the ten-inch main to the Brockton main; when the pipe can be used or disposed of.

We installed all the extensions authorized with the exception of Willow Avenue.

This street is very narrow and the soil very wet. The fall rains coming before we had completed the installation first voted, we decided to postpone Willow Avenue until next year. We feared the street would be dangerous for travel during the winter and spring, if opened up so late in the year with no chance to dry out.

Our Financial Statement differs from that of the Town Accountant, because his covers only amounts paid before Jan. 1, 1914, while ours include as well the bills incurred during 1913 but not paid until 1914.

This is necessary in order to show the entire income and expense to Jan. 1, 1914.

	East East		
	Beav.	End	Beav.
Consumers added on Extensions of 1913	47	9	16
Total Consumers Jan. 1, 1914	493	72	55

Total Consumers all Systems, 620.

There are also services laid from which the consumers have not commenced to take water; Bridgewater System 3 and East End 2.

The East Bridgewater System has been fully metered for the past six months. During that time the meters of consumers have recorded about 59 per cent. of the amount recorded by the large meter of the Bridgewater's Water Co.

The difference shows the amount used by Schools and other public buildings, fountains, fires, Street Department, Flushing hydrants, leaks in pipes, filling new mains and amount passing through small meters without being recorded.

RECEIPTS AND EXPENSES OF THE VARIOUS SYSTEMS

The Office Expenses, Superintendence and Meter Reading, and Colection Expneses are divided between the systems as follows; East Bridgewater, 80 Per cent.; East End, 12 per cent. and Beaver, 8 per cent. This being the approximate ratio of income of the systems.

Deed of Indenture

THIS DEED OF INDENTURE made this thirty-first day of March, 1913, by and between the BRIDGEWATERS WATER COMPANY, a corporation duly chartered and organized under and according to the laws of the State of Massachusetts and located in the towns of Bridgewater and East Bridgewater in said State, (said Company being hereinafter referred to as the Water Company), party of the first part; and the Inhabitants of the town of East Bridgewater, a municipal corporation in the County of Plymouth and Commonwealth of Massachusetts, (said municipal corporation being hereinafter referred to as The Town), party of the second part.

WITNESSETH:— First. Said Water Company in consideration of the sum of One Hundred Thousand Dollars (\$100,000) paid to it by the party of the second part, the receipt whereof is hereby acknowledged, has granted, bargained, sold and conveyed, and by these presents doth grant, bargain, sell and convey unto the said Town, party of the second part, the mains, pipes, hydrants, real estate, and other corporate property of said Water Company located within the limits of said Town of East Bridgewater, together with all franchise and charter rights and privileges pertaining thereto so far as the same relate to that part of the equipment of said Water Company lying within the limits of said Town of East Bridgewater.

TO HAVE AND TO HOLD the above described and granted premises and property, and every part and portion thereof, unto the party of the second part, said Town of East Bridgewater, its successor or successors and assigns forever.

AND the party of the first part, said Water Company, hereby covenants with the party of the second part, said Town, that it the party of the first part is the lawful owner of the said property hereby conveyed, that the same is free from all encumbrances, that it has good right to sell the same as aforesaid, and that it will WARRANT AND DEFEND the same against the lawful claims and demands of all persons.

Second. The party of the first part, said Water Company, hereby agrees to furnish and deliver to the said Town for the use of itself and its inhabitants for the period of three (3) years from the date hereof a supply of water for the extinguishment of fires and for domestic, manufacturing and other purposes, at the price of eight (8) cents per thousand gallons for the period of three years aforesaid. Said Water Company further agrees to furnish and maintain a satisfactory meter for the measurement of water so furnished and agrees to inspect said meter at least once a month. Bills for said water so furnished shall

be rendered by said Water Company to said Town quarterly, on the first days of July, October, January and April.

Third. Said Town agrees to receive and pay for the water furnished as aforesaid at the price mentioned. Said water shall be furnished and received at a point where the water pipe of said Water Company now enters the Town of East Bridgewater unless the parties shall otherwise agree.

IN WITNESS WHEREOF the said Bridgewaters Water Company has caused its corporate seal to be hereto affixed and these presents to be signed in duplicate in its name and behalf by its President and Treasurer, and the said Town of East Bridgewater has caused its corporate seal to be hereto affixed and these presents to be signed in its name and behalf in duplicate by its Board of Selectmen, the day and year first above named.

BRIDGEWATERS WATER COMPANY,

EUGENE N. FOSS, Pres.

JOSEPH WEEKS, Treasurer.

TOWN OF EAST BRIDGEWATER,

By EZRA S. WHITMARSH,

FRED P. WHITMARSH,

ARTHUR C. CHURCHILL,

Selectmen.

COMMONWEALTH OF MASSACHUSETTS.

SUFFOLK, ss.

Boston, Mar. 31, 1913.

Then personally appeared the above-named Eugene N. Foss and Joseph Weeks, to me known, and known to be respectively the President and Treasurer of the Bridgewater Water Company, and acknowledged the foregoing instrument by them subscribed to be the free act and deed of the Bridgewater Water Company.

HOLLIS R. BAILEY,
Justice of the Peace.

VOTE OF STOCKHOLDERS.

WHEREAS, the Citizens of the Town of East Bridgewater, at a Town Meeting held on the 18th day of December, 1912, voted to purchase the pipe lines and all other property of the Bridgewaters Water Company, located in the Township of East Bridgewater,

BE IT RESOLVED that the Stockholders of the Bridgewaters Water Company hereby vote to sell to the Town of East Bridgewater all their property located in the Township of East Bridgewater, for the sum of ONE HUNDRED THOUSAND DOLLARS (\$100,000), and

BE IT ALSO RESOLVED that the Directors of the Bridgewaters Water Company be, and hereby are, authorized to take such steps as may be necessary to legally consummate the sale.

A true copy of vote of stockholders of Bridgewaters Water Company passed January 14, 1913, at a meeting duly called and held at which there was present and voting stockholders representing 975 shares out of a total of 1000 shares issued and outstanding.

JOSEPH WEEKS,
Clerk.

VOTE OF DIRECTORS.

WHEREAS, the Citizens of the Town of East Bridgewater at a meeting held the 18th day of December, 1912, voted to buy all the property of the Bridgewaters Water Company, located in the Township of East Bridgewater, and

WHEREAS, the Stockholders of the Bridgewaters Water Company at a Stockholders' Meeting, called for that purpose, held this 14th day of January, 1913, voted to sell all their property located in the Town of East Bridge-

water for the sum of ONE HUNDRED THOUSAND DOLLARS (\$100,000), and instructed the Board of Directors to take such steps as are legally necessary to consummate the sale,

BE IT RESOLVED that the American Trust Company, as Trustee for the Bondholders, be, and hereby is requested to release all the property of the Bridgewater Water Company located in the Township of East Bridgewater, upon the payment of SEVENTY-FIVE THOUSAND DOLLARS (\$75,000), and

BE IT ALSO RESOLVED that the President and Treasurer of the Bridgewater Water Company be, and hereby are authorized to sign and execute such a modification of the mortgage deed of trust as may be satisfactory to the Trustee, and to sign and execute a deed of transfer of the Company's property in East Bridgewater to the Town of East Bridgewater upon payment of ONE HUNDRED THOUSAND DOLLARS (\$100,000), and any other documents as may be necessary to legally consummate the sale, and

BE IT ALSO RESOLVED that the President and Treasurer of the Company be, and hereby are authorized to arrange with the Bondholders for the reduction of the mortgage indebtedness of the Company, on a basis satisfactory to the Bondholders and the Trustee.

A true copy of vote of Directors of Bridgewater Water Company passed January 14, 1913, at a meeting duly called at which a quorum was present.

JOSEPH WEEKS,
Clerk.

PARTIAL RELEASE.

KNOW ALL MEN BY THESE PRESENTS, that the AMERICAN TRUST COMPANY, the present Trustee and Mortgagee under a certain deed of trust and mortgage dated May 1, 1890, and recorded with Plymouth

County Registry of Deeds in Book 783, pages 89 to 102 both inclusive, in consideration of Seventy-five Thousand Dollars (\$75,000) paid by the Inhabitants of the Town of East Bridgewater, a municipal corporation in the County of Plymouth and Commonwealth of Massachusetts, the receipt whereof is hereby acknowledged, does hereby remise, release and FOREVER QUITCLAIM unto the said the Inhabitants of the town of East Bridgewater all the right, title and interest which said American Trust Company acquired and holds under the aforesaid deed of trust and mortgage given by the Bridgewaters Water Company in or to that portion of the property therein conveyed which is described as follows, namely: the mains, pipes, hydrants, real estate and other corporate property of the said Bridgewaters Water Company located within the limits of the Town of East Bridgewater aforesaid, together with all franchise and charter rights and privileges pertaining thereto so far as the same relate to that part of the equipment of said Water Company lying within the limits of said Town of East Bridgewater.

TO HAVE AND TO HOLD the same to the said the Inhabitants of the Town of East Bridgewater and its successors and assigns to their own use and behoof forever.

But this release shall not in any way affect or impair the right of said American Trust Company as Trustee and Mortgagee under said deed of trust and mortgage to hold under the said deed of trust and mortgage and as security for the sum remaining due thereon, or to sell under the power of sale in said deed of trust and mortgage contained, all the remainder of the property therein conveyed and not hereby released.

IN WITNESS WHEREOF the said AMERICAN TRUST COMPANY, Trustee and Mortgagee, has caused

its name to be signed hereto by R. G. Fessenden its President, and its corporate seal to be hereto affixed and attested by Charles H. Bowen its Secretary, this 31st day of March, A. D., 1913.

AMERICAN TRUST COMPANY,
BY R. G. FESSENDEN, Pres.,
CHARLES H. BOWEN, Sec.

[Seal]

COMMONWEALTH OF MASSACHUSETTS

SUFFOLK, ss.

Boston, April 2nd, 1913.

Then personally appeared the above named R. G. Fessenden to me known, and known to be the President of the American Trust Company, and acknowledged the foregoing instrument by him subscribed to be the free act and deed of the American Trust Company.

Before me,
EUGENE W. LEIGHTON,
Notary Public.

[Seal]

WHEREAS the American Trust Company is the present Trustee and Mortgagee under a certain deed of Trust and Mortgage dated May 1, 1899, given by the Bridgewaters Water Company to secure an issue of First Mortgage Bonds of said Bridgewaters Water Company amounting in the aggregate to One Hundred Fifty Thousand Dollars (\$150,000), and

WHEREAS said Bridgewaters Water Company and the holders of all of the outstanding bonds issued under and secured by said Deed of Trust and Mortgage dated May 1, 1899, have deemed it for their interests to amend the terms of said Deed of Trust and Mortgage to the end that there may be a partial release of said Mortgage

and a cancelation and retirement of one-half of the bonds secured by said Deed of Trust and Mortgage:

VOTED: That R. G. Fessenden and C. H. Bowen, President and Secretary, respectively, be and hereby are authorized and directed to execute on behalf of said American Trust Company as Trustee, when approved by counsel, a certain amendatory indenture dated March 31, 1913, by and between the said Bridgewater Water Company, the holders of all outstanding bonds issued under and secured by said Deed of Trust and Mortgage dated May 1, 1899, and the American Trust Company as Trustee, which amends said original Deed of Trust and Mortgage dated May 1, 1899, by inserting before the testimonium clause thereof the following words and figures, to wit:

"And it is further agreed that the present or any succeeding Trustee hereunder shall for the sum of Seventy-Five Thousand Dollars (\$75,000), to be paid to it as a part of the fund for the payment of said bonds and used for the payment and cancellation of seventy-five (75) of the outstanding bonds issued under and secured by said Deed of Trust and Mortgage, with coupons numbered twenty-eight (28) to sixty (60) both inclusive attached to said bonds, release from the lien and operation of said Deed of Trust and Mortgage the following described premises and property, being a portion of the mortgaged premises and property namely, the mains, pipes, hydrants, real estate and other corporate property of said Bridgewater Water Company located within the limits of said town of East Bridgewater, together with all franchise and charter rights and privileges pertaining thereto*so far as the same relate to that part of the equipment of said Water Company lying within the limits of said town of East Bridgewater."

VOTED: That R. G. Fessenden, President, and C. H. Bowen, Secretary, are authorized to execute a partial re-

lease from under the said Deed of Trust and Mortgage of May 1, 1899, of the property as authorized to be released by provisions of said amendatory indenture of March 31, 1913, and in the form approved by counsel.

Boston, April 3, 1913.

C. H. Bowen, Secretary of the American Trust Company, hereby certifies that the foregoing is a true extract from the minutes of the meeting of the Executive Committee of the Board of Directors of the American Trust Company held Thursday, April 3, 1913, at which a quorum was present and voting.

Attest:

C. H. BOWEN,
Secretary.

EXTRACT FROM BY-LAWS OF THE AMERICAN
TRUST COMPANY,
BOSTON.

"The Executive Committee shall have and exercise, when the Board of Directors is not in session, all the powers of the Board which can be lawfully delegated, and shall supervise all the business of the Company, and shall adopt such regulations therefor, and give such directions to the officers in respect thereto, as the interests of the Company seem to them from time to time to require, which are not repugnant to the By-Laws or the regulations and votes adopted by the Board of Directors; and in case of a vacancy in any office or of the absence or inability to act of any officer, agent or servant of the Company, the Executive Committee may choose or appoint one of its own number, or some officer of the Company or other person to fill the vacancy."

Boston, April 3, 1913.

I, Charles H. Bowen, Secretary of the American Trust Company, hereby certify that the foregoing is a true extract from the By-Laws of the American Trust Company, of Boston, Massachusetts, and the same has never been revoked or amended and is still in full force and effect.

Attest:

C. H. BOWEN,
Secretary.

April 5, 1913, at 9 o'clock and 40 minutes, A. M., RECEIVED and ENTERED with PLYMOUTH COUNTY DEEDS; Book 1147, Pages 254-257.

SUPERINTENDENT'S OFFICE HOURS

Mondays and Thursdays, when schools are in session, at the High School.

Hours: 3.30 p. m. to 4.30 p. m.

Report of School Committee

COMMITTEE

Herbert C. Thorndike	Term expires 1914
Cleaveland A. Chandler	Term expires 1914
John E. O'Brien	Term expires 1915
William H. Taylor	Term expires 1915
Edward T. Morse	Term expires 1916
Samuel K. Nutter	Term expires 1916

At the annual town meeting in March, Edward T. Morse and Samuel K. Nutter, whose terms had expired, were re-elected for three years.

The committee organized at its March meeting. W. H. Taylor, chairman; S. K. Nutter, secretary; Edward T. Morse, treasurer; W. H. Taylor, prudential committee. They also appointed the following truant officers: W. T. Greene, Geo. Hudson, Edgar H. Grout and T. S. H. Rounseville.

We are glad to report that we have been able to retain the services of Mr. E. H. Grout, as superintendent of schools. We feel that his work has been highly satisfactory and of real value to the schools.

The new High School building was ready for occupancy, and the school opened there at the beginning of the fall

term. One hundred and ten pupils have been enrolled, the largest number in the history of the school. The commercial course recently adopted and introduced into the school is proving a popular feature, and bids fair to be of great benefit to any who desire to take advantage of it. Already 70 pupils are taking the whole or a part of this course.

On our repairs this year we were obliged to make a large overdraft, on our own appropriation for that purpose. This was caused partly by putting new furniture in the West building, which was not anticipated when we made our estimates. We were obliged to lay new floors in this building. After this was done, it seemed to us unwise to reset the old style, and badly worn desks and chairs. Hence, after due consideration on our part, modern, adjustable furniture was purchased and placed in the two rooms. This involved a considerable expense, but we believe it will be economy in the end.

Then in the Fall we were ordered by the State Police to cause the outside doors on all the school houses in town to swing outward, and to replace all existing locks, with vestibule latches, that could not be fastened on the inside. Also to install fire extinguishers in all the buildings. We have complied with these instructions. The bill for the fire extinguishers, about \$100.00, has been paid. The remainder of the expense will be paid out of the 1914 appropriation.

We have furnished the Satucket school room with slate blackboards this year. All the schools in town are now supplied with these boards, and we anticipate no more expense in that line.

The Northville school house has been shingled and minor repairs on all school property have been attended to, whenever and wherever needed. One side of the Eastville house

must be shingled another year, and the fences around some of the yards renewed.

We recommend the following appropriations for 1914:

Support of Schools	\$13,075 00
Superintendent	525 00
Books and Supplies	900 00
Incidentals	400 00
Minor Repairs	600 00
Medical Inspector	75 00
Transportation	800 00

Per Cent. of attendance	93	94
Number of different pupils in attend- ance during the year	675	737
Aggregate number of months kept by all the schools	157m. 15d.	151m. 13d.
Average number of months kept by each school	8m. 15d.	8m. 8½d.

During the past calendar year eight of our teachers have resigned to accept better positions elsewhere. While we regret the loss of teachers who have been trained in our schools, we must recognize the fact that their election to much better positions is a compliment to our own school system. Fortunately, also, the changes necessitated by these resignations came, with one exception, during the summer vacation, a time when they could be made with a minimum amount of loss and inconvenience.

In my last report reference was made to the recently inaugurated plan of giving small certificates at the end of each school month to those pupils who had been neither absent nor tardy during that time. Seven or more of these small certificates earned during the year would entitle the holder to a larger certificate. More than one hundred pupils earned the larger certificate. Others tried equally hard but failed through sickness or other unavoidable causes.

The result of this attempt to secure more regular attendance is shown in the record for the year. Notwithstanding the unusual amount of sickness among the pupils, eleven schools had a better record of attendance than the year before, and the per cent. of attendance for the town was raised from ninety-three to ninety-four, the average for the past ten years being ninety-three per cent.

The annual tests for defective sight and hearing have been made with the following results: Number of pupils examined 715; number with defective vision, 28; number with defective hearing, 7; number of parents notified, 28. The report of the medical inspector is incorporated with this report and should receive careful consideration.

For a number of years it has been the practice for the ninth grade to present some gift to the school on the day of graduation. The gift of the class graduating last June was a Victor machine, a gift that is enjoyed by all pupils of the building and one which will prove of great value to the work in music.

Reference to the preceding table will show the phenomenal growth of our school system during the past two years. In this time there has been an increase of more than fifteen per cent. in enrolment, carrying our membership past the seven hundred mark. Since school opened in September our largest enrolment has been seven hundred, twenty-four. Of this number two hundred, seventy-five were in attendance at the Allen school, the normal capacity of which is two hundred fifty-two pupils. By utilizing the small office in this building as a recitation room, and by putting the first grade on half-time, we shall be enabled to care for this increased membership during the present school year. Training teachers from the Bridgewater Normal School are assisting the regular teachers. Next year it will be necessary to house the ninth grade in the High School building. The Pond school will still be used as an overflow for the Elmwood and West schools. Even with this arrangement the problem will undoubtedly present serious difficulties that must be solved before another year has passed. The problem of a growing school system is with us and as a community we must be prepared to meet it.

The work in practical arts has gone on much as usual the past year, taking the form of useful and helpful occupations in the schoolroom. Desk drawers and locks have been repaired, books mended and covered, shelf for plants varnished and put in place, and the yard and approaches kept free from papers and litter. Some of the girls have also learned to embroider. It is hoped that next year we shall be able to report some progress in sewing and other domestic arts.

The compulsory vaccination law is again quoted in full for the benefit of parents having children to enter school next September. "A child who has not been vaccinated

shall not be admitted to a public school except upon presentation of a certificate granted for cause stated therein, signed by a regular practising physician, that he is not a fit subject for vaccination." Parents are urged to attend to this matter at an early date and not defer vaccination until the time of opening school in September.

During the early spring a home garden club was organized under the auspices of the Men's Club, with the Economic Club co-operating. Prizes were offered for the best vegetables and flowers grown during the summer, under certain stipulated conditions, the contest being open to pupils below the High school. About ninety boys and girls participated in the contest and their gardens were inspected twice during the summer. On September 15 a very creditable display of the products was held in the High school building, at which time the prizes were awarded as follows:

Vegetables Gardens—1st, James Bouldry; 2nd, Mary King; 3rd, John Cormier. Honorable mention; Sumner Johnson, Clarence Johnson, John Campbell, Sidney Johnson, Austin Reed.

Flower Gardens—1st, Rita De Sousa; 2d, Olive Dunphe, Honorable mention; Marion Miner, Rachel Bartlett, Lena Reed, Arthur King, Anna Leland.

SCHOOL SAVINGS BANK.

On October first the privileges of the school savings bank system were extended to nearly all of the schools in town. The following statement is given as a summary of the business done during the year 1913.

Number of rooms	17
Number of enrolled pupils in such rooms	700
Number of deposits received during the year	3648

Amount of deposits received during the year	\$829.35
Number of withdrawals, not including amounts transferred to the East Bridgewater Sav- ings Bank pass books	59
Amount of such withdrawals	\$82.24
Amount to credit of depositors in school savings bank	\$365.87
Number of pupils to whom Saving Bank pass books have been issued during the year by East Bridgewater Savings Bank	105
Amount of deposits tranferred to such pass books	\$604.00

Some of the money included in the above statement would have found its way into the savings bank, even if the school bank had not been organized; it is equally true, on the other hand, that a large part of it represents actual savings which, without the help of the school bank, would have been spent unwisely. The system needs no further commendation; the figures given above speak for themselves.

RECENT LEGISLATION

One of the most important school measures passed at the last session of the Legislature is known as the Massachusetts Teachers' Retirement System, an arrangement for paying annuities and pensions to teachers. So far as teachers are concerned this system goes into effect July 1, 1914.

Teachers already in the service of the public schools or who may enter such service before June thirtieth of the present year may, upon application to the commissioner of education, become members of the retirement association. Teachers who enter the service on or after July first shall

thereby become members of the association. This act, however, does not apply to teachers in the Boston schools.

The management of the retirement system is vested "in the teachers' retirement board, consisting of seven members: the insurance commissioner for the commonwealth, the bank commissioner for the commonwealth, the commissioner of education for the commonwealth, three members of the retirement association and one other person."

The funds of the retirement system are derived from assessments paid by members of the retirement association and from such amounts as shall be appropriated by the general court from time to time on estimates submitted by the retirement board. The rate of assessment, determined annually by the retirement board, "shall at any given time be uniform for all members of the retirement association, and shall not be less than three per cent. nor more than seven per cent. of the members' salary." It is further provided, however, that no member shall be assessed less than thirty-five dollars nor more than one hundred dollars for any school year. This assessment is paid in regular instalments due on pay days and is deducted by the city or town treasurer from the teacher's salary. All deductions are forwarded once a month to the secretary of the retirement board. The state treasurer is the custodian of the funds. Assessments are payable until retirement, but no teacher is required to contribute more than thirty assessments.

Members of the association may retire at the age of sixty and must retire at seventy. The school committee, with the approval of the retirement board, can retire a teacher over sixty years of age. To share in the retiring allowances a member must have taught at least fifteen years in Massachusetts, five years of which must immediately precede retirement. The retirement allowance in a given case is

made up of such an annuity as the assessments for the given period would buy plus a pension for an equal amount provided by the state, and in no case is to be less than three hundred dollars.

Teachers withdrawing from service before becoming eligible for the retiring allowance have all their assessments refunded to them, with interest at three per cent. compounded annually. The law makes no provision for disability before the teacher reaches the age of sixty, except the refunding of assessments with interest as stated above; it provides merely for old age. The teacher's interests, however, are so well safeguarded that she has much to gain and practically nothing to lose from membership in the association.

Another important piece of school legislation enacted the past year is that relating to the employment of minors. This act took effect September first, and under its provisions all working certificates issued prior to that date became obsolete. The issuing of new forms to all employed minors between fourteen and twenty-one years of age entailed a great deal of extra work upon the superintendent of schools, as well as occasioning inconvenience to employers and employees. The law is, however, a distinct advance in legislation, limiting the hours of labor for minors and women and closing to them certain dangerous occupations. The restrictions as to hours and occupations placed upon minors between fourteen and sixteen years of age will make it more difficult than formerly for such to find employment and will have a tendency to keep these boys and girls in school. Before leaving school a boy or girl over fourteen and under sixteen years of age must obtain an employment certificate from the office of the superintendent of schools. Before this can be granted, however, the applicant must file with

the office a promise of employment, a physician's certificate, a school record, and one of a series of prescribed proofs of age. Minors from sixteen to twenty-one years of age can obtain an educational certificate on presenting the proper form of proof of age. A circular giving an outline of the laws relating to the employment of women and children can be obtained on application to the superintendent of schools.

TABLE SHOWING LOCAL TAX FOR SUPPORT OF SCHOOLS.

Year	Assessed Valuation of Town	Tax Rate	Actual Cost to the Town for Support of Schools	Appropriation for each \$1,000 of Valuation	Average Membership	Cost per Pupil in Average Membership
1902	\$1,589,606	\$18.00	\$10,675.99	\$6.72	491	\$21.74
1903	1,620,176	18.00	10,290.24	6.35	534	19.27
1904	1,630,916	18.00	10,001.96	6.13	514	19.46
1905	1,677,102	17.20	10,673.50	6.38	534	19.99
1906	1,693,055	17.50	10,842.50	6.40	533	20.34
1907	1,733,646	18.00	10,742.48	6.20	561	19.15
1908	1,965,410	18.50	11,298.99	5.75	558	20.24
1909	2,078,620	18.30	11,972.36	5.76	561	21.34
1910	2,087,387	18.40	12,817.16	6.19	576	22.25
1911	2,243,721	19.40	13,813.66	6.15	598	23.09
1912	2,257,623	19.50	15,083.12	6.68	604	24.97
1913	2,364,158	19.80	15,645.91	6.62	646	24.22

The above table is of special interest to taxpayers and should receive careful consideration. From it we learn that while the assessed valuation of the town has increased 48 per cent since 1902, the cost to the town for the support of schools has increased but 46 per cent in the same time. The actual burden upon the town for support is less for 1913 than it was for 1912, and the cost per pupil for the same periods has dropped seventy-five cents.

HIGH SCHOOL

Our new building is at last a reality and more than meets the expectations of teachers and pupils as a center for all school activities. Well lighted and easily heated, with rooms conveniently arranged, the building is proving an almost ideal place for successful school work. The program clock, installed in the principal's office, electrically controls all the secondary clocks throughout the building and automatically rings the bells for the daily program of the school. Classes are called and dismissed without loss of time and without thought or attention on the part of the teachers. The entire school moves figuratively and literally like clockwork.

The courses of study have been re-arranged and enriched the past year so that now our curriculum compares favorably with that of larger schools. Not only are opportunities presented for fitting for college, normal and technical schools, but we can now prepare competent boys and girls for actual positions in the business world. A school can do much for a boy or girl but not everything. The pupil must remember that the school is but a miniature world, wherein he receives a training for the larger world which he must soon enter and in which he will find there is but little room for the man or woman who has not learned to share in the hard work and responsibilities of life.

There seems to a growing spirit of loyalty to the school, a spirit that is fostered by the heathful development of athletics and by proper attention to the social life of the pupils.

I would call attention at this point to the report of the principal and particularly to that part in which he discusses the necessity of employing an extra teacher. The

school is in splendid condition and we cannot afford to take any steps backward through failure to provide sufficient teaching force.

In this connection it is proper to speak of the report made to the Association for the Revision of College Entrance Requirements. At present it is practically impossible for the smaller high schools to provide preparation for college and at the same time offer courses which represent the trend of modern educational thought and practice. Furthermore, it has happened that pupils who would undoubtedly do good work in college, if given the opportunity, have been automatically excluded through failure to meet the entrance requirements in certain traditional subjects. The plan recommended in this report provides that such subjects as drawing, manual training, household arts, music, agriculture, and commercial branches may be substituted for some of the traditional subjects usually offered for admission to college. By this plan pupils desiring a college training will be encouraged to pursue subjects that have a "vital interest for them and that will function with their future lives." It is believed that the adoption of this plan would be a distinct benefit not only to the high school but to the colleges as well, by drawing to them boys and girls of exceptional ability in subjects not at present recognized by colleges in their entrance requirements.

Report of the High School Principal

*Mr. Edgar H. Grout, Superintendent of Schools, East
Bridgewater, Mass.*

The High school opened for the fall term, Sept. 10, 1913, with an enrolment of 46 boys and 63 girls for a total of 109. During the five months of this school year the average membership has been 105.95, the average attendance 102.45, and the per cent of attendance 96.69. There have been 313 absences, 149 cases of tardiness, and 70 dismissals.

Irregularity in attendance, whether counted in absences, dismissals or as tardiness, is a detriment to good school work quite as much as to clean school records. Moreover, it tends to breed a habit which modern industrial requirements will not tolerate. There has been some improvement in this line over last year, and I feel that parents are ready to co-operate with the school for still better things.

Near the close of the spring term printed courses of study were issued to all prospective students at the High school. This has resulted in a more thoughtful selection of school courses by the pupil and more influence in each choice by the parent.

In contrast to the situation last year we now have an excellent laboratory for use by the science classes. The equipment should be increased each year that the practise of studying General Science and the two, branch sciences,

Physics and Chemistry, by actual participation in experimental work, may be extended to include a large nucleus of all the work done in these studies.

During the past five months the following donations of pictures and books have been received and are hereby gratefully acknowledged:—Hadrian's Tomb, presented by the Class of 1912; Class of 1913, by the Class; Old High School Building, by Mrs. Edgar H. Grout; Golden Stair Case, Angelus, A Reading From Homer, together with two jardiniere stands, by Miss Packard, the Post Graduates and two upper classes; King Arthur's Court, by the Class of 1909, New Students' Reference Work, 4 vols., by Miss Ruth Esther Pratt, class of 1911, and the American Mechanical Dictionary, 4 vols., by Mr. P. H. Pratt. In addition to these gifts the High school received a center table and two chairs for the Rest Room from the Woman's Economic club of East Bridgewater.

The gymnasium has proved to be a strong feature of the new High school plant. Both boys and girls have received much benefit from its use. Strong teams cannot be developed in one year but the record of our teams has been creditable and promising. This phase of school life has a very positive value.

The new building makes possible a much richer school life than ever before and stimulates interest along lines that have long been open. At the close of the fall term the Senior Class gave a play in the Town Hall for the benefit of the Washington trip fund. Under the direction of Miss Packard, Le Cercle Francais, composed of thirty-five members of the French classes, holds meetings once a month in the Assembly Hall. French songs are sung and dramatized portions of stories are given. The meetings are conducted

entirely in French. By this means the classes gain greater facility in the use of the French Language and interest in the routine of class work is stimulated.

There has been a change in the teaching corps during the current term, Miss Elsie Anderson taking the position as teacher of English and History vacated by Miss Anna B. Pearce, who resigned after serving for two and a half years.

The Business Course has continued along the lines worked out last year. Miss Gladys Jennison, who was in charge last year, left in September to accept a position in the Somerville High School and her place has been filled by Miss Harriet E. Staples. The total enrolment in this course is 70.

In its scope the Commercial Department has been extended and bettered but modifications have been necessary this year, and to provide a sufficient amount of Shorthand, Commercial Geography, Commercial Law and Business Practise have been deferred till next year.

Last year the work was planned with the purpose of giving Seniors as much of the whole subject of Shorthand as they could master. This plan borrowed ahead somewhat upon the interest of those who returned this year to continue the course, though they have bravely faced the drudgery of "Twice Told Tales."

Ten graduates have been enrolled this year for advanced courses and in many classes have added much to the progress by their earnest, purposeful work. At the end of this year certificates for the work done will be of much value to them.

We cannot expect to take up all lines of work that a large High school can offer. Nor is there a sufficiently wide range of needs to make it either necessary or desirable that we should do so. It should be our purpose, however, to do the work we may reasonably undertake just as efficiently as the best school in the state. The opportunity for association with and attention to the needs of each pupil will then make our course assuredly equal in value to the best. In pursuance of this aim the following considerations are worth attention:—

Next year there will be added to our recitation program another class in French and classes in Algebra and Plane Geometry.

The school is 60 per cent larger than it was two years ago, 35 per cent larger than last year, and there is promise of a slight increase next year.

The class periods ought to be lengthened from 35 to 45 minutes each, especially if this school is to be placed on the New England College Entrance Certificate Board's "Approved List."

Several classes in the Freshman year are too large to enable the teacher to be helpful to part of the class without retarding or killing the interest of the other part. Better work could be done if these classes could be divided and much loss of valuable human material could be prevented.

Considering the degree of exactness expected in commercial work the needs of 70 pupils cannot be adequately met by one teacher.

It will be difficult even to go through the motions of carrying our curriculum with the present corps of teachers, and suggested changes will be impossible unless a fourth assistant teacher is appointed to relieve the tension

in existing departments and possibly add one or more much needed studies.

Statistics from more than a dozen towns in Massachusetts reveal the fact that we have the minimum number of teachers for schools of this size. Several with the same number of pupils have two more, and a nearby town, with twenty-five more pupils, has twice as many assistant teachers. The time is no far distant when this question must receive attention.

In closing I wish to commend those who have worked with me, and thank those under whose direction we have worked, for the co-operation and helpfulness that have been accorded me.

WILLIAM J. NUTTER,
Principal.

Report of Medical Inspector

To the School Committee and Superintendent of Schools.

I herewith submit my report to you as Medical Inspector:—

DISEASES OF MOUTH, NOSE AND THROAT

Decayed teeth	70
Enlarged tonsils	95
Enlarged tonsils with adenoids	54
Adenoids only	3
Deviated septum	1

EYES

Blepharitis marginalis	3
Conjunctivitis	2
Cross-eyed	2

EARS

Defective hearing	3
-------------------	---

HAIR AND SCALP

Pediculosis	5
Seborrhea capitis	10

SKIN

Acne	3
------	---

TUBERCULOSIS

Hunchback	1
Hip joint	1

ENLARGED GLANDS

Cervical, side of neck	4
------------------------	---

GENERAL DISEASES

Deformed face	2
Anemia	4
Impediment in speech	3

A few parents accepted the advice given in regard to the removal of tonsils and adenoids in their children and I wish that other parents might see the marked improvement, mentally and physically, in those children. It seems that this question must be emphasized each year but if we can convince only a few that this operation is necessary we will be satisfied that our advice is not in vain.

The cost of the operation no doubt is an important factor for not having it done, but I will say here that it will be done for a moderate fee at several of the hospitals in Brockton, generally on Saturdays by appointment. The state of the children's teeth was even worse than last year; I had hoped for an improvement in this condition but was disappointed. Bad teeth are breeding places for germs, as well as the tonsils, and should receive the proper treatment, for the reason that it costs less.

The only improvement noted—and it was agreeably so—was the condition of lousiness, no lice and very few nits were found.

Respectfully submitted

W. B. BANNERMAN.

CONCLUSION

Many people, probably, have little if any conception of the demands made upon the teacher today, regarding her position as a sort of sinecure. To dispel any such delusion the following extract is quoted from an educational paper. Though written in a somewhat humorous vein, it is packed full of food for meditation.

“She (the teacher) must know more, do more, be more and endure more than any other breadwinner. She must know everything in heaven above, the earth beneath and the waters under the earth. She receives no special credit for knowing them but woe to her if she knows them not. She must teach the three R’s as in olden times, but mark the additions. She must teach physiology with the skill of a physician but without his opportunity of hiding mistakes. She must teach civics with the learning of a lawyer but without his library. She must teach virtue and goodness with all the zeal of a minister but without his Bible and sectarian bias. She must teach music, drawing, penmanship, physical culture with the ability of a specialist, but must give the supervisor all the credit for the success attained. She must teach business forms, business usage, short cuts and brief methods with all the knowledge of a bookkeeper, or the schools are considered impractical.”

In closing this report I wish to emphasize anew the importance of co-operation between the home and the school and to impress upon parents their obligation in this respect. Co-operation implies an attempt on the part of teachers and parents to understand each the other's problem and to give all possible help in its solution. Upon the teacher devolves the duty of knowing something of the home environment of her pupils; upon the parents devolves the duty of a first-hand knowledge of the schools through visitation and of a more or less intimate acquaintance with the persons to whom is entrusted the care of their children for a period of five or more hours each day. With a better understanding of actual conditions, there should pass away unreasonable criticism and malicious gossip so destructive to the best interests of the school and home.

Respectfully submitted,

EDGAR H. GROUT,

Superintendent of Schools.

East Bridgewater, Mass., January 30, 1914.
